When Texas Prison Scams Religion Michael G. Maness, 2023-05-22 When Texas Prison Scams Religion exposes corruption in the Texas Department of Criminal Justice especially in the abuse of religion In many ways this book is a literature review of 1 800 plus works that defends freedom of conscience in prison while exposing the unconstitutionality of the seminary program that buys faith with favor from prisoners The state veritably ordains the prisoner a Field Minister that represents the offices of the Governor TDCJ Director and wardens throughout the prison Therein TDCJ lies about neutrality in a program all about Christian missions and lies again in falsely certifying elementary Bible students as counselors Why is the director sponsoring psychopaths counseling psychopaths In fact TDCJ pays 314 million a year to UTMB for psychiatric care and receives not a single report of the care given and worse for UTMB generates no reports itself The underbelly TDCJ s executive culture of cover up is exposed TDCJ has hired the lowest qualified of the applicant pool many times in the last 25 years and regularly destroys statistics on violence TDCJ Dir Collier led the prison to model Louisiana Warden Burl Cain the most scandal ridden in penal history according to a host of published news stories for 20 years Therein Collier led TDCJ to favor the smallest segment of religious society within Evangelical Dominionism Texas has no business endorsing the truth of any religion over another We close with a proposal that utilizes the 400 000 000 hours of officer contact over ten years as a definitive influence in contrast to a commissioner that spends less than 10 minutes on each decision Maness has been lobbying Austin for 15 years to definitively access staff for his 100 000 Mothers 1% Certainty Parole Texas Constitutional Amendment which would revolutionize prison culture and save Texans millions of the dollars

Black-and-White Thinking Kevin Dutton, 2025-10-16 A groundbreaking and timely book about how evolutionary biology can explain our black and white brains and a lesson in how we can escape the pitfalls of binary thinking Several million years ago natural selection equipped us with binary black and white brains Though the world was arguably simpler back then it was in many ways much more dangerous Not coincidentally the binary brain was highly adept at detecting risk the ability to analyze threats and respond to changes in the sensory environment a drop in temperature the crack of a branch was essential to our survival as a species Since then the world has evolved but we for the most part haven't Confronted with a panoply of shades of gray our brains have a tendency to force quit to sort the things we see hear and experience into manageable but simplistic categories We stereotype pigeon hole and above all draw lines where in reality there are none In our modern interconnected world it might seem like we are ill equipped to deal with the challenges we face that living with a binary brain is like trying to navigate a teeming city center with a map that shows only highways In *Black and White Thinking* the renowned psychologist Kevin Dutton pulls back the curtains of the mind to reveal a new way of thinking about a problem as old as humanity itself While our instinct for categorization often leads us astray encouraging polarization rigid thinking and sometimes outright denialism it is an essential component of the mental machinery we use to make sense of the world Simply put unless we perceived our environment as a chessboard our brains wouldn't be able to play the game Using the latest advances in psychology neuroscience and evolutionary biology Dutton shows how we can optimize our tendency to categorize and fine tune our minds to avoid the pitfalls of too little and too much complexity He reveals the enduring importance of three super categories fight or flight us versus them and right or wrong and argues that they remain essential to not only convincing others to change their minds but to changing the world for the better *Black and White Thinking* is a scientifically informed wake up call for an era of increasing extremism and a thought provoking uplifting guide to training our gray matter to see that gray really does matter
