Golan,2016 The largest weapons development effort ever undertaken by the State of Israel the Lavi fighter program envisioned a new generation of high performance aircraft Controversially Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with U S financial support The sophisticated planes developed in the mid 1980s were unique in design and intended to make up the majority of the Israeli Air Force Though a great deal of prestige and money was staked developmental costs increased and doubts arose as to whether the Lavi could be the warplane it was meant to be Eventually the program became a microcosm for the US Israel relationship and of Israeli society itself a study in the ambitions fears and internal divisions that shaped them The fighter never made it to operational service Despite the passage of time since its cancelation the Lavi remains a controversial subject within Israeli society to this day Until now the full breadth and significance of the Lavi story has never been told *Lavi Israel's Lost Winged Lion* traces the evolution of the Lavi fighter from its genesis in the 1970s to its demise in August of 1987 Painting the era's political landscape on both sides of the ocean author John Golan examines the roles of such Israeli military icons and political leaders as Ezer Weizman Ariel Sharon Menachem Begin and Yitzhak Rabin On the American side Golan traces the evolution of U S government policy towards the program detailing a complex nuanced picture of the U S foreign policy apparatus and of U S Israel relations in general from President Reagan's public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger's unrelenting attempts to cancel the program in succeeding years Engineering Psychology and Cognitive Ergonomics Don Harris,2017-07-05 This is the fifth edited volume of refereed contributions from an international group of researchers and specialists Volumes Five and Six comprise the edited proceedings of the third international conference on Engineering Psychology Cognitive Ergonomics organized by Cranfield College of Aeronautics Edinburgh Scotland in October 2000 Volume Five concentrates on applications in the areas of transportation medical ergonomics and training Topics addressed include the design of control and display systems human perception error reliability information processing and performance modelling mental workload stress automation situation awareness skill acquisition and retention techniques for evaluating human machine systems and the physiological correlates of performance Both volumes will be useful to applied and occupational psychologists instructors instructional developers equipment and system designers researchers government regulatory personnel human resource managers and selection specialists also to senior pilots air traffic control and aviation and ground transportation operations management Air Force Disappointments, Mistakes, and Failures Kenneth

Werrell,2024-06-18 While successful developments in aviation receive considerable attention the projects that failed or otherwise did not live up to expectations receive far less if any scrutiny Typically unsuccessful efforts are briefer in duration and have a less visible paper trail Thus while the literature is rich in success stories we tend to forget or simply bury our failures And as one observer has suggested that there were failures mistakes and wrong turns reminds us that progress is not inevitable that acknowledged error can be as instructive as success and that roads not taken impose a price all their own Here author Kenneth P Werrell tells of a race to overcome obstacles politics resources competing technologies timing in the quest to deliver quality if not war winning machinery The focus of Air Force Disappointments Mistakes and Failures 1940 1990 is on aircraft e g bombers fighters transports and missiles e g cruise missiles standoff missiles ballistic missiles surface to air missiles air to air missiles An intelligence system is also evaluated These case studies give the context and details of the development testing and as appropriate operational service Highlighting the problems and criticisms of these systems then provides an opportunity to determine what went wrong The reasons for the failures of these systems vary from the obvious money delays technical problems to more complex reasons such as the foe s reaction politics new technologies and timing The tale of these disappointments is a heretofore untold story These projects in which the US Air Force stumbled are outliers within the overall success of the service and fortunately its successes outnumber the failures **Technology and**

the Air Force Jacob Neufeld,2009-06 Proceedings of a symposium co sponsored by the Air Force Historical Foundation and the Air Force History and Museums Program The symposium covered relevant Air Force technologies ranging from the turbo jet revolution of the 1930s to the stealth revolution of the 1990s Illustrations **Eye of the Viper** Peter Aleshire,2005-11-01

Hand picked pressure tested and full of astronaut gung ho the young pilots of Eye of the Viper are poised for the toughest assignment of their career the exhaustive six month training course at Arizona s Luke Air Force Base at a cost of 2 million each Luke the world s largest fighter wing is the only F 16 fighter training base in the United States and each year it produces one thousand pilots who will fly the F 16 from Korea to Afghanistan to Iraq But being among the elite pilots who are selected for the course is by no means a guarantee that they will earn the right to fly the F 16 Only a few select individuals will have what it takes Award winning journalist Peter Aleshire provides a full blast of the rigors and intensity of the course the personalities the incredible machines the irreverence the bravado and the toughness not only of the hand picked students seeking a place in the warrior subculture but of the veteran pilots who must teach them how to stay alive

Coalition Air Warfare in the Korean War, 1950-1953 Air Force Historical Foundation. Symposium,2005 In commemoration of the fiftieth anniversary of the Korean War the official history offices of the U S Army Navy Marine Corps and Air Force and their respective historical associations collaborated to sponsor as comprehensive a symposium as possible including as participants some of the coalition partners who contributed forces and weapons to the war The intent of this symposium titled Coalition Air Warfare during the Korean War 1950 1953 was to focus not only on the contributions made by

the armed forces of the United States but also on those of America's allies. The diverse group of panelists and speakers included not only scholars with subject matter expertise but also veteran soldiers, sailors, and airmen who had served in that conflict. It was hoped that the melding of these diverse perspectives would provide interesting if sometimes conflicting views about the Korean War. The symposium organizers designated an agenda of six specific panels for investigation including Planning and Operations, Air Superiority, Air Support of Ground Forces, Air Interdiction and Bombardment, Air Reconnaissance and Intelligence, and Logistical Support of Air Operations. Each session began with commentary by the panel chairman which was followed by formal papers, and in some instances included a lively question and answer session. The papers and most of the proceedings found their way into print and are recorded here in an effort to permanently capture the activities, challenges, contributions, and heroics of the coalition air forces and the airmen who fought during the Korean conflict.

Routledge Handbook of Air Power John Andreas Olsen, 2018-02-20. The Routledge Handbook of Air Power offers a comprehensive overview of the political purposes and military importance of air power. Despite its increasing significance in international relations, statecraft, and war, the phenomenon of air power remains controversial and little understood beyond its tactical and technological prominence. This volume provides a comprehensive survey designed to contribute to a deep and sophisticated understanding of air power. Containing contributions from academics and service personnel, the book comprises five sections: Part I, Foundation, the essence of air power; Part II, Roles and functions, delivering air power; Part III, Cross domain integration, applying air power; Part IV, Political, social, economic environment, air power in its strategic context; Part V, Case studies, air power in its national context. Examining a series of themes and factors that contribute to an understanding of the utility and applicability of air power, this Handbook focuses on the essence of air power, identifies its roles and functions, and places air power in its wider strategic and national contexts. The Routledge Handbook of Air Power will be of great interest to students of air power, strategic studies, defence studies, security studies, and IR, as well as to military professionals and policy makers.

Weapons & Warfare Salem Press, 2010. This work features 140 chronologically arranged overviews of the history of weaponry and military tactics from ancient times to the present global age. Originally published in 2002, *Weapons and Warfare* is designed to meet the needs of students seeking information about weaponry, tactics, and models of warfare from ancient times to the present worldwide. Written with the needs of students and general readers in mind, the articles contained in this set present clear discussions of the topics, explaining any terms or references that may be unclear. The focus is on the technical and strategic development of weapons and tactics, more than on a narrative chronological history of events. This allows students of history, political science, science, and technology alike to gain a broad understanding of the technological and strategic advances made over time and geography. The new third volume adds the essential dimension of placing these topics in broad social, cultural, and ethical contexts. Approximately 140 topics are arranged chronologically and thematically with volume 1.

Ancient and Medieval covering weapons and strategies from ancient times to 1500 volume 2 The Modern Era covering weapons and strategies from approximately 1500 to the present and volume 3 Warfare Cultural and Concepts providing valuable overviews of the way warfare weapons and military history have been expressed socially politically and in the arts Each essay ranges from 1 500 words to 7 000 words The first two volumes open with overviews of major weapons groups for example in volume 1 Clubs Maces and Slings Sieges and Siegecraft in volume 2 Swords Daggers and Bayonets Rockets Missiles and Nuclear Weapons followed by chronologically arranged sections covering major historical periods and regions of the world and their contributions to military weapons technologies and strategies Volume three touches on all sociocultural and political aspects of culture society science ethics and basic behind the battlefield theories strategies and policies The essays in this set are organized into three essay types Weapons overview articles are organized with sections on Nature and Use and Development of each weapons type The geographically arranged warfare articles feature sections on Political Considerations where relevant and on Military Achievement Weapons Uniforms and Armor Military Organization Doctrine Strategy and Tactics Warfare articles also feature a section on the primary sources from which historians base their observations and evaluates the best sources for understanding the warfare of the period Culture concept overviews new approach warfare and weaponry from several different perspectives sociological geographical cultural ritual political ethical religious tactical and strategic
