The Death of Hamlet Amir Khan, 2025-01-06 This book is an intervention in Hamlet scholarship In Thus Spake Zarathustra 1885 Nietzsche famously posited the death of God taken to mean the dissolution of all horizons within which human beings construct a plausible ontology that gives words significance The idea of God as a transcendental signified to borrow from Derrida underwrites meaning and values Socrates placed knowing as the highest philosophical good over two millennia ago however once we find that God i e any transcendental signified is unknowable the world vanishes In a world bereft of concepts and meaning Nietzsche's philosophical project becomes one of redeeming pure willing as itself constitutive of world Hamlet and the criticism surrounding it is caught within competing horizons we know are circuitous and unending We tiresomely make theoretical rounds between competing sets of interpretations that boil down to either establishing meaning within the play the text transcending its history and revealing universal truths or situating the text within its proper historical timeframe in order to get it to speak In short we are trapped between contextualizing and decontextualizing approaches Yet we know both approaches as competing horizons we commit to at the outset are dead But to abandon both at the outset means that the text Hamlet is itself dead So how to get it to speak

Shakespeare and the Experimental Psychologist Fathali M. Moghaddam, 2021-06-10 This book explores thought experiments in Shakespeare and shows how experimental psychology can be found in early modern English literature

Tropes and the Literary-Scientific Revolution Michael Slater, 2024-04-02 Tropes and the Literary Scientific Revolution Forms of Proof argues that the rise of mechanical science in the seventeenth century had a profound impact on both language and literature To the extent that new ideas about things were accompanied by new attitudes toward words what we commonly regard as the scientific revolution inevitably bore

literary dimensions as well. Literary tropes and forms underwent tremendous reassessment in the seventeenth century and early modern science was shaped just as powerfully by contest over the place of literary figures from personification and metaphor to anamorphosis and allegory. In their rejection of teleological explanations of natural motion for instance, early modern philosophers often disputed the value of personification, a figural projection of interiority onto what was becoming increasingly a mechanical world. And allegory, a dominant mode of literature from the late Middle Ages until well into the Renaissance, became the vice of those times as Thomas Rymer described it in 1674. This book shows that its acute devaluation was possible only in conjunction with a distinctively modern physics. Analyzing writings by Sidney, Shakespeare, Bacon, Jonson, Brahe, Kepler, Galileo, Hobbes, Descartes and more, it asserts that the scientific revolution was a literary phenomenon just as the literary revolution was also a scientific one.

Shakespearean Star Jennifer Barnes, 2017-07-06 Laurence Olivier was one of the best known and most pioneering actor-directors of Shakespeare on screen. This is the first study to provide a comprehensive analysis of Olivier's Shakespearean feature films and his unique Shakespearean star image. Through an examination of Olivier's unmade film *Macbeth* as well as his adaptations of Shakespeare's *Henry V*, *Hamlet* and *Richard III*, Jennifer Barnes offers a detailed exploration of Olivier's entire cinematic Shakespearean oeuvre in relation to his distinctive form of stardom. Considering the development of Olivier's image in relation to the industrial and cultural contexts of the wartime and post-war British film and theatre industries, the volume also analyses Olivier's life writing and published autobiographies and is supplemented by numerous illustrations.
