Isabel Allende's House of the Spirits Trilogy Karen Wooley Martin, 2010 The source of the narrative energy that creates such absorbing stories Allende's very popular novels have attracted both critical approval and opprobrium often at the expense of genuine analysis This sophisticated study explores the narrative architecture of Allende's House of the Spirits 1982 Daughter of Fortune 1999 and Portrait in Sepia 2000 as a trilogy proposing that the places created in these novels subvert the patriarchal norms that have governed politics sexuality and ethnicity Rooted in the Foucauldian premise that the history of space is essentially the history of power and supported by Susan Stanford Friedman's cultural geographies of encounter as well as Gloria Anzaldá's study of borderlands this study shows that by rejecting traditional spatial hierarchies Allende's trilogy systematically deterritorializes the elite while shifting the previously marginalized to the physical and thematic centers of her works This movement provides the narrative energy which draws the reader into Allende's universe and sustains the good story for which she has been universally acclaimed KAREN WOOLEY MARTIN is Associate Professor of Spanish at Union University Jackson Tennessee

Ordinary Enchantments Wendy B. Faris, 2004 Ordinary Enchantments investigates magical realism as the most important trend in contemporary international fiction defines its characteristics and narrative techniques and proposes a new theory to explain its significance In the most comprehensive critical treatment of this literary mode to date Wendy B Faris discusses a rich array of examples from magical realist novels around the world including the work not only of Latin American writers like Gabriel García Márquez but also of authors like Salman Rushdie Günter Grass Toni Morrison and Ben Okri Faris argues that by combining realistic representation with fantastic elements so that the marvelous seems to grow organically out of the ordinary magical realism destabilizes the dominant form of realism based on empirical definitions of reality gives it visionary power and thus constitutes what might be called a remystification of narrative in the West Noting the radical narrative heterogeneity of magical realism the author compares its cultural role to that of traditional shamanic performance which joins the worlds of daily life and that of the spirits Because of that capacity to bridge different worlds magical realism has served as an effective decolonizing agent providing the ground for marginal voices submerged traditions and emergent literatures to develop and create masterpieces At the same time this process is not limited to postcolonial situations but constitutes a global trend that replenishes realism from within In addition to describing what many consider to be the progressive cultural work of magical realism Faris also confronts the recent accusation that magical realism and its study as a global phenomenon can be seen as a form of commodification and an imposition of cultural homogeneity And finally drawing on the narrative innovations and cultural scenarios that magical realism enacts she extends those principles toward issues of gender and the possibility of a
