Encyclopedia of Global Warming and Climate Change, Second Edition S. George Philander, 2012-07-10 This Second Edition of an academic yet non technical resource examines the effects history and ongoing research in the important field of global warming and climate change Polar Ice and Global Warming in Cryosphere Regions Neloy Khare, 2024-03-21 Polar Ice and Global Warming in Cryosphere Regions is based on recent and past climate variabilities data gathered through satellites and spatial temporal analysis to explain the role of global warming on cryosphere regions such as high latitude Himalaya Arctic and Antarctic regions and the surrounding Southern Ocean and Arctic Ocean Through several case studies the book describes the atmospheric processes and their interactions with high latitude regions toward a better understanding of climate variability Understanding cryosphere regions helps readers develop plausible models for disaster risk management and policy on different polar events Features Presents a thorough review on climate variability over the Southern Ocean and Antarctica and the impact of climate variability and global warming on cryosphere regions Explains how the inferred climatological environmental conditions using natural archives may shed light on climate scenarios in cryosphere regions Includes case studies on globally connected geoscientific phenomena in the Himalayan Arctic and Antarctic regions Discusses the use of natural archives to explain the current climate scenario in the cryosphere regions Intended for researchers academics and graduate students following oceanography meteorology or environmental studies and those working on projects related to climate change in governmental organizations institutions and global NGOs this book outlines ways in which readers can initiate plans and policies to help mitigate the effects of global warming in these regions Climate and Catastrophe in Cuba and the Atlantic World in the Age of Revolution Sherry Johnson, 2011 From 1750 to 1800 a critical period that saw the American Revolution French Revolution and Haitian Revolution the Atlantic world experienced a series of environmental crises including more frequent and severe hurricanes and extended drought Drawing

The Crisis of the 14th Century Martin Bauch, Gerrit Jasper Schenk, 2019-12-16 Pre modern critical interactions of nature and society can best be studied during the so called Crisis of the 14th Century While historiography has long ignored the environmental framing of historical processes and scientists have over emphasized nature's impact on the course of human history this volume tries to describe the at times complex modes of the late medieval relationship of man and nature The idea of teleconnection borrowed from the geosciences describes the influence of atmospheric circulation patterns often over long distances It seems that there were teleconnections in society too So this volume aims to examine man

environment interactions mainly in the 14th century from all over Europe and beyond It integrates contributions from different disciplines on impact perception and reaction of environmental change and natural extreme events on late Medieval societies For humanists from all historical disciplines it offers an approach how to integrate written and even scientific evidence on environmental change in established and new fields of historical research For scientists it demonstrates the contributions scholars from the humanities can provide for discussion on past environmental changes

Dictionary of Global Climate Change W.J. Maunder, 2012-12-06 Climate climate change climate fluctuations and climatic trends are only a few of the terms used today in not only conferences scientific symposia and workshops but also parliaments and in discussions throughout society To climatologists these terms may be well known to the vast majority of people however they are new and they require definition and explanation The World Meteorological Organization WMO inherited an interest and involvement in the studies of climate and climate change from its predecessor the International Meteorological Organization IMO which was established in 1873 By 1929 the IMO had set up a Commission for Climatology to deal with matters related to climate studies When in 1950 the World Meteorological Organization assumed the mantle of the IMO it retained the commission which among other responsibilities had already recognized the need for the definition and explanation of terms used in climatology It must also be said that much of what we now know about climate derives from the scientific and technical programmes coordinated by IMO and now to a much greater extent by WMO In 1979 the First World Climate Conference made an assessment of the status of knowledge of climate and climate variability and recommended the establishment of a World Climate Programme This recommendation was fully endorsed by the Eighth World Meteorological Congress and the World Climate Programme was subsequently established by WMO in co operation with the International Council of Scientific Unions ICSU and the United Nations Environment Programme UNEP

Historical Atlas of Northeast Asia, 1590-2010 Narango Li, Robert Cribb, 2014-06-17 Four hundred years ago indigenous peoples occupied the vast region that today encompasses Korea Manchuria the Mongolian Plateau and Eastern Siberia Over time these populations struggled to maintain autonomy as Russia China and Japan sought hegemony over the region Especially from the turn of the twentieth century onward indigenous peoples pursued self determination in a number of ways and new states many of them now largely forgotten rose and fell as great power imperialism indigenous nationalism and modern ideologies competed for dominance This atlas tracks the political configuration of Northeast Asia in ten year segments from 1590 to 1890 in five year segments from 1890 to 1960 and in ten year segments from 1960 to 2010 delineating the distinct history and importance of the region The text follows the rise and fall of the Qing dynasty in China founded by the semi nomadic Manchus the Russian colonization of Siberia the growth of Japanese influence the movements of peoples armies and borders and political social and economic developments reflecting the turbulence of the land that was once the world's cradle of conflict Compiled from detailed research in English Chinese Japanese French Dutch German Mongolian and Russian sources the Historical Atlas of

Northeast Asia incorporates information made public with the fall of the Soviet Union and includes fifty five specially drawn maps as well as twenty historical maps contrasting local and outsider perspectives Four introductory maps survey the region s diverse topography climate vegetation and ethnicity

the date of establishment of an organization and discuss its mission and significance for climate change Biographical essays provide biographical information on people followed by descriptions of their life and climate work and Top Twenty Emitter essays provide information on each of the twenty nations with the highest annual emissions of greenhouse gases they also provide discussions of the historical and political context of the nation's climatic impact Law and Treaty essays provide the date of passage or ratification of the law and protocol as well as lists of all participating nations and continue with discussions of background summary of provisions and significance for climate change

A Mist Connection Katrin Kleemann, 2023-06-06 In the summer of 1783 an unusual dry fog descended upon large parts of the northern hemisphere The fog brought with it bloodred sunsets a foul sulfuric odor and a host of other peculiar weather events Inspired by the Enlightenment many naturalists attempted to find reasonable explanations for these occurrences Between 8 June 1783 and 7 February 1784 a 27 kilometer long fissure volcano erupted in the Icelandic highlands It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium In Iceland the eruption led to the death of one fifth of the population The jetstream carried its volcanic gases further afield to Europe and beyond where they settled as a fog the origin of which puzzled naturalists and laypersons *A Mist Connection* is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world The book combines methods of historical disaster research climate history global history history of science and geology in an interdisciplinary approach Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years it is crucial to understand their nature so that we can prepare for the next one An eruption of this magnitude would surely be disastrous for our modern globalized and interconnected world

Postcards from the Anthropocene Benek Cincik, Tiago Torres-Campos, 2022-04-19 This book includes various responses to the geopolitical conditions of our tangent times through collections of visual materials and theoretical explorations with critical positionings The book expands on the Anthropocene theory by exploring its relations with the aesthetic concerns in contemporary representations through their geopolitical ramifications We conceptualize postcards as documentary space time snapshots which convey complex assemblages of dynamic non linear unpredictable ad hoc networks between interdependent and transcalar actors in deep time The postcards we assemble raise questions about the ethical and political challenges of the dominant modes of technoscientific knowledge production modes that are constituted through existing power relationships subject positions and differences and that perpetuate current inequalities They catalyse speculative and creative geopolitical imaginaries and collective subjectivities that recalibrate existing value systems and indicate alternatives
