The Growth Of Biological Thought Diversity Evolution And Inheritance:

The Growth of Biological Thought Ernst Mayr, 1982 Explores the development of the ideas of evolutionary biology particularly as affected by the increasing understanding of genetics and of the chemical basis of inheritance

Ornithology, Evolution, and Philosophy Jürgen Haffer, 2007-11-19 This book is the first detailed biography of Ernst Mayr He was an architect of the Synthetic Theory of Evolution and the greatest evolutionary biologist since Charles Darwin He is one of the most widely known biologists of the 20th century *Variations in Organization Science* Donald Thomas Campbell, Joel A. C. Baum, Bill McKelvey, 1999-05-14 In my judgment this book in honor of Donald T Campbell will be very influential and highly cited It will become a must read for Ph D students and scholars in strategy and organization theory Arie Lewin Duke University The topics in this volume are cutting edge and the contributors are first rate The book is well anchored Donald T Campbell has had a profound influence on the field Moreover the book is well conceptualized socio cultural evolution co evolution methods modeling and epistemology are key issues in organization science right now Michael Tushman Harvard University If he were an assistant professor today what would social science giant Donald T Campbell be pursuing in the field of organization science Joel A C Baum and Bill McKelvey explore this question in *Variations in Organization Science* This volume reveals and celebrates Campbell s many contributions to organization science by presenting new variations that stem directly from his work Rather than analyze Campbell s theories the authors present ideas that Campbell might have pursued if he were currently a doctoral student This volume is unique in its focus on coevolution and multilevel coevolutionary analysis as well as in its range of subject matter from empirical studies to leading edge epistemological discourses Each of the book s four main sections focuses on a major aspect of Campbell s legacy blind variation selection and retention multilevel coevolution process level analysis and modeling and epistemology and methodology In addition the volume includes a Foreword by Barbara Frankel Campbell and an unusual Appendix Donald Campbell s complete curriculum vitae *Variations in Organization Science* should be on the top of the reading list for any organization scientist interested in organizational evolution change and competitiveness This volume will also appeal to any scholar interested in the human and social capital base of firms and how organizational knowledge and learning work to provide the basis of competitive advantage

The Knowledge of Nature and the Nature of Knowledge in Early Modern Japan Federico

Marcon, 2015-07-16 From the early seventeenth to the mid nineteenth century Japan saw the creation development and apparent disappearance of the field of natural history or honzogaku Federico Marcon traces the changing views of the natural environment that accompanied its development by surveying the ideas and practices deployed by honzogaku practitioners and by vividly reconstructing the social forces that affected them These include a burgeoning publishing industry increased circulation of ideas and books the spread of literacy processes of institutionalization in schools and academies systems of patronage and networks of cultural circles all of which helped to shape the study of nature In this pioneering social history of knowledge in Japan Marcon shows how scholars developed a sophisticated discipline that was analogous to European natural history but formed independently He also argues that when contacts with Western scholars traders and diplomats intensified in the nineteenth century the previously dominant paradigm of honzogaku slowly succumbed to modern Western natural science not by suppression and substitution as was previously thought but by creative adaptation and transformation

Conservation Biology for All Navjot S. Sodhi, Paul R. Ehrlich, 2010-01-08 Conservation Biology for All provides cutting

edge but basic conservation science to a global readership A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting edge conservation knowledge as widely as possible Important topics such as balancing conservation and human needs climate change conservation planning designing and analyzing conservation research ecosystem services endangered species management extinctions fire habitat loss and invasive species are covered Numerous textboxes describing additional relevant material or case studies are also included The global biodiversity crisis is now unstoppable what can be saved in the developing world will require an educated constituency in both the developing and developed world Habitat loss is particularly acute in developing countries which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found Sadly developing world conservation scientists have found it difficult to access an authoritative textbook

which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest There is now an urgent need to educate the next generation of scientists in developing countries so that they are in a better position to protect their natural resources

Evolutionary Thinking Across Disciplines Agathe du Crest, Martina Valković, André Ariew, Hugh Desmond, Philippe Huneman, Thomas A. C. Reydon, 2023-06-26 This volume aims to clarify the epistemic potential of applying evolutionary thinking outside biology and provides a survey of the current state of the art in research on relevant topics in the life sciences the philosophy of science and the various areas of evolutionary research outside the life sciences By bringing together chapters by evolutionary biologists systematic biologists philosophers of biology philosophers of social science complex systems modelers psychologists anthropologists economists linguists historians and educators the volume examines evolutionary thinking within and outside the life sciences from a multidisciplinary perspective While the chapters written by biologists and philosophers of science address theoretical aspects of the guiding questions and aims of the volume the chapters written by researchers from the other areas approach them from the perspective of applying evolutionary thinking to non biological phenomena Taken together the chapters in this volume do not only show how evolutionary thinking can be fruitfully applied in various areas of investigation but also highlight numerous open problems unanswered questions and issues on which more clarity is needed As such the volume can serve as a starting point for future research on the application of evolutionary thinking across disciplines

Conservation of Faunal Diversity in Forested Landscapes R.M. DeGraaf, R.I. Miller, 2012-12-06 Forest wildlife conservation is critically required in many parts of the world today This book presents a merger between the elements of wildlife conservation and habitat conservation and explains how these disciplines can be used to promote the conservation of vertebrates in forests around the world

Philosophy and the Mixed Race Experience Tina Fernandes

Botts,2016-01-21 *Philosophy and the Mixed Race Experience* is a collection of essays by philosophers about the mixed race experience Each essay is meant to represent one of three possible things 1 what the philosopher sees as the philosopher s best work 2 evidence of the possible impact of the philosopher s mixed race experience on the philosopher s work or 3 the philosopher s philosophical take on the mixed race experience The book has two primary goals 1 to collect together for the first time the work of professional academic philosophers who have had the mixed race experience and 2 to bring these essays together for the purpose of adding to the conversation on the question of the degree to which factual identity and philosophical work may be related The book also examines the possible relationship between the mixed race experience and certain philosophical positions

The Architectonic of Reason Lea Ypi,2021 This book focuses on a question issued from *The Architectonic of Pure Reason* one of the most important sections of Kant s first Critique what is the human being It suggests that the answer to this question is tied to a particular account of the unity of reason one that stresses its purposive character

Transformations of Lamarckism Snait B. Gissis,Eva Jablonka,2011-04-22 A reappraisal of Lamarckism its historical impact and contemporary significance In 1809 the year of Charles Darwin s birth Jean Baptiste Lamarck published *Philosophie zoologique* the first comprehensive and systematic theory of biological evolution The Lamarckian approach emphasizes the generation of developmental variations Darwinism stresses selection Lamarck s ideas were eventually eclipsed by Darwinian concepts especially after the emergence of the Modern Synthesis in the twentieth century The different approaches which can be seen as complementary rather than mutually exclusive have important implications for the kinds of questions biologists ask and for the type of research they conduct Lamarckism has been evolving or in Lamarckian terminology transforming since *Philosophie zoologique* s description of biological processes mediated by subtle fluids Essays in this book focus on new developments in biology that make Lamarck s ideas relevant not only to modern empirical and theoretical research but also to problems in the philosophy of biology Contributors discuss the historical transformations of Lamarckism from the 1820s to the 1940s and the different understandings of Lamarck and Lamarckism the Modern Synthesis and its emphasis on Mendelian genetics theoretical and experimental research on such Lamarckian topics as plasticity soft epigenetic inheritance and individuality and the importance of a developmental approach to evolution in the philosophy of biology The book shows the advantages of a Lamarckian perspective on evolution Indeed the development oriented approach it presents is becoming central to current evolutionary studies as can be seen in the burgeoning field of Evo Devo *Transformations of Lamarckism* makes a unique contribution to this research
