**Alessandro Piccolomini's Early Astronomical Works: II. An Examination of Their Scientific Content** Elly Dekker, 2024-09-01 This book presents the first detailed scientific examination of Alessandro Piccolomini's two early astronomical works *De la Sfera del Mondo* and *De le Stelle Fisse* First published in Venice in 1540 the two treatises are amongst the earliest scientific texts written in the vernacular Italian and were specifically composed to make astronomical principles and practices available to a lay reader Whereas *De la Sfera del Mondo* is essentially an updated adaptation of the theoretical astronomical material contained in Sacrobosco's *De Sphaera* this book examines his views on a number of key topics such as precession the motion of the solar apogee and the size and distance of the planets from Earth The author also presents a radical reassessment of *De le Stelle Fisse* focusing on the innovative methods Piccolomini employed to create a viewer centric approach for identifying the stars As such Piccolomini's guide to the heavens should be seen as a distant forerunner of the successful genre of elementary handbooks that were developed in the late 18th century and which remain popular with amateur stargazers even in the 21st century The book also addresses how Piccolomini's treatises were used by contemporary astronomers by examining the manuscript notes that were left in various surviving copies of his books It provides a convincing explanation of the unique directional notation on his stellar maps and assesses the relative accuracy of his stellar co ordinates against contemporary and modern ephemerides and pictorial sources It also argues that Piccolomini probably designed his distinctive series of maps of the constellations and the related Tables by using a celestial globe to compile his astronomical data Finally the author examines the series of refinements and corrections in the successive editions of Piccolomini's two treatises thereby showing the extent to which his two early astronomical treatises remained an on going enterprise for over 60 years This book is a companion volume to *Alessandro Piccolomini's Early Astronomical Works I An Exploration of Their Cultural Significance* by Kristen Lippincott in the same series The two volumes are jointly available as print set with ISBN 978 3 031 76964 1 *Deer, the Star Catcher and Woman Bringer* Richard Arling Marshall, 2013-05-30 The story is of a young Chahta Choctaw boy's odyssey into manhood prior to the European discovery of the Americas The young man Issi Deer lives at Nanih Wayia the Chahta Mother Site Winston County Mississippi Throughout the story Issi shows a great deal of character as he nears adulthood mixing the real world with the spirit world In a cross cultural way the story is a kind of imaginary time travel where people lived quite differently from us yet were as human and

as loving having the same feelings and hopes but expressing and achieving them with different thoughts and actions They are referred as the Oklafihna and the Chito meaning the Great People The Oklafihna are a village and community and a part of the greater collegium of peoples later known as the Chahta Within the story are brief glimpses of the people the geographic place and the environment The story is a fictional adventure placed primarily in Mississippi and the adjacent states Comments on the ethnographic customs and descriptions of daily living and activities are based upon the written literature enhanced by the writer s personal interpretations of the Southeastern United States Indians and their archaeology and imagination Many places referenced are actual though little known Brief historical comment is made of places when important to the understanding of the story and place The story hopefully builds a believably real and acceptable construct of Issi s time place and adventure mixed with the spirit world Moderate use of Chahta words throughout the story lend authenticity About the Author Richard Arling Marshall has spent more than fifty years as a teacher and archeologist Born in 1928 in Belen New Mexico he grew up in Missouri graduating with a bachelor s in art and science and obtained a master s degree in anthropology from the University of Missouri Columbia Missouri After 1966 the author was associated with the Department of Sociology and Anthropology and the Cobb Institute of Archaeology Mississippi State University as professor of anthropology and conducted research and salvage archaeology and Cultural Resource Surveys throughout that state He retired in 1994 as associate professor of anthropology emeritus The author s wife is Helen Justine Noe formerly of Lilbourn Missouri Together they have two daughters and five grandchildren 2013 Paperback 568 pages
