STUDYING PEDIGREES ACTIVITY

Introduction: A pedigree is a visual chart that depicts a family history or the transmission of a specific trait. They can be interesting to view and can be important tools in determining patterns of inheritance of specific traits. Pedigrees are used primarily by genetic counselors when helping couples decide to have children when there is evidence of a genetically inherited disorder in one or both families. They are also used when trying to determine the predisposition of someone to carry a hereditary disease for example, familial breast cancer.

Source: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2729292/>

The Components of a Pedigree:

Squares are used to indicate males in a family.

Circles are used to indicate females.

If the individual is "affected" by the trait (dominant or recessive) we darken the shape.

A line between a male and a female indicates a marriage or union.

A line drawn down from the marriage line indicates offspring.

Sometimes, you will see some shapes filled in only half way - this notation indicates a **hybrid** (heterozygous) or carrier of the trait

Studying Pedigrees Activity:

Youth Physical Activity and Sedentary Behavior Alan L. Smith, Stuart J.H. Biddle, 2008-07-24 As interest in the public health challenge of youth inactivity increases the ambitious Youth Physical Activity and Sedentary Behavior sets a standard for addressing a problem with worldwide implications Drawing on the contributions of a diverse group of international experts this reference challenges professionals researchers and students to implement new solutions and further their research and work No other text addresses the causes contributing factors and fundamental issues in dealing with youth physical activity with such depth or comprehensive coverage Using a multidisciplinary approach Youth Physical Activity and Sedentary Behavior breaks away from traditional thinking that places activity and sedentary behavior on a single continuum which may limit progress in addressing youth inactivity Instead the authors encourage readers to focus on how sedentary and physically active behaviors coexist and consider how the two behaviors may have different determinants In doing so the text also considers developmental features such as maturation ethnicity environment and genetics across both childhood through age 12 and adolescence the teen years By looking at a variety of psychosocial and epidemiological factors the authors set the stage for a critical analysis of beliefs and views at a time when many assumptions are taken for granted This book is organized in three parts that build on one another to deepen readers understanding of this complex problem This text begins by addressing the fundamental issues and assumptions pertaining to youth physical activity and sedentary behavior covering such topics as measurement of the behavior in question health outcomes concepts and trends in a public health context Once readers have grasped this foundational knowledge they advance to part II for a comprehensive account of personal factors likely to be associated with the problem Part III moves beyond the individual into the wider social and contextual aspects of physically active and sedentary living in young people Through this concluding part readers gain the latest thinking on how parents peers schools organized sport and related factors link to youth physical activity and sedentary behavior Each chapter presents the latest theory and research real world approaches to implementation and background information to encourage discussion and future directions in national policy making Youth Physical Activity and Sedentary Behavior also contains the following features that add to an unprecedented learning experience An at a glance look at why and how research can be used in the real world helps researchers relate their work to overall solutions Coverage of more issues related to this subject than are available in any other reference makes this a one stop resource Internationally respected foreword writer editors and contributors provide a cross disciplinary perspective valuable for putting solutions into a wider context Applications for Professionals boxes and Applications for Researchers boxes at the end of each chapter provide practical suggestions for implementing solutions Youth Physical Activity and Sedentary Behavior Challenges and Solutions considers current research about youth physical activity and sedentary behavior across a range of personal factors as well as cultural and social influences The text communicates the knowledge base on developmental economic

psychological and social factors related to youth physical activity and sedentary behavior and provides an overview of youth specific approaches to addressing the problem of inactivity among youth Designs for Learning Environments of the Future Michael Jacobson, Peter Reimann, 2010-03-10 Few things are as certain as societal changes and the pressing need for educators to prepare students with the knowledge and ways of thinking necessary for the challenges in a changing world In the forward thinking pages of Designs for Learning Environments of the Future international teams of researchers present emerging developments and findings in learning sciences and technologies at the infrastructure curricular and classroom levels Focusing on ideas about designing innovative environments for learning in areas such as biology engineering genetics mathematics and computer science the book surveys a range of learning technologies being explored around the world a spectrum as diverse as digital media computer modeling and 3D virtual worlds and addresses challenges arising from their design and use The editors holistic perspective frames these innovations as not only discrete technologies but as flexible learning environments that foster student engagement participation and collaboration Contributors describe possibilities for teaching and learning in these and other cutting edge areas Working with hypermodels and model based reasoning Using visual representations in teaching abstract concepts Designing strategies for learning in virtual worlds Supporting net based collaborative teams Integrating innovative learning technologies into schools Developing personal learning communities Designs for Learning Environments of the Future will enhance the work of a wide range of professionals including researchers and graduate students in the learning and cognitive sciences and educators in the physical and social sciences

Epidemiologic Methods in Physical Activity Studies I-Min Lee, 2009 This book provides information regarding epidemiologic methods used in studies of physical activity It is intended for use by students and researchers in physical activity and in public health and by researchers and professionals using physical activity data e g exercise physiologists and health economists Additionally those interested in physical activity and health who want to understand and appropriately interpret the results of physical activity studies e g physicians and journalists may also find the book useful BOOK JACKET

The Journal of Heredity, 1916 The journal discusses articles on gene action regulation and transmission in both plant and animal species including the genetic aspects of botany cytogenetics and evolution zoology and molecular and developmental biology American Breeders Magazine, 1915 **Joslin's Diabetes Mellitus** Elliott Proctor Joslin, C. Ronald Kahn, 2005 The bible on diabetes mellitus is now in its Fourteenth Edition thoroughly revised and updated by more than 80 noted experts from the Joslin Diabetes Center and other leading institutions worldwide This edition includes a new eleven chapter section on hormone action and the regulation of metabolism The section on definition and pathogenesis now includes chapters on genetics diabetes in Asia and Africa and diabetes in U S minority groups Other new chapters cover retinopathy cardiovascular disease wound healing and treatment of women with diabetes All of the Fourteenth Edition s figures have been completely updated The Water-cure Journal, and Herald of Reforms, Devoted to Physiology.

Biological Psychiatry, Higher Nervous Activity P. Pichot,2013-06-29 The purpose of the World Psychiatric Association is to coordinate the activities of its Member Societies on a world wide scale and to advance enquiry into the etiology pathology and treatment of mental illness To further this purpose the Association organizes mono or multithematic Regional Symposia in different parts of the world twice a year and World Congresses dealing with all individual fields of psychiatry once every five or six years Between these meetings the continuation of the Association s scientific work is assured through the activities of its specialty sections each covering an important field of psychiatry The programs of the World Congresses reflect on the one hand the intention to present the coordinating functions of the Association and on the other to open a broad platform for a free exchange of views Thus the VII World Congress of Psychiatry held in Vienna from July 11 to 16 1983 was composed of two types of scientific events those structured by the Association and those left to the initiative of the participants The first type comprised Plenary Sessions planned by the Scientific Program Committee and Section Symposia organized by the WPA sections the second embraced Free Symposia free papers video sessions and poster presentations prepared by the participants Altogether 10 Plenary Sessions 52 Section Symposia and 105 Free Symposia took place and 78 free papers and poster sessions and 10 video sessions were held

Topics in Pathophysiology of Hypertension H.V. Villareal,M.P. Sambhi,2012-12-06 It is not often that one one writes the foreword for a book based on a conference which contributed so much to our knowledge in the field of hypertension During my close association with the International Society of Hypertension from 1978 1982 numerous satellite symposia were held in connection with five international meetings The specific topics addressed in this volume the quality of the contributions and the superb expertise of the contributors make this monograph one of the most outstanding publications that the International Society of Hypertension has sponsored Satellite symposia such as the present one serve useful and important functions for our society They provide a mechanism of getting together the outstanding experts on special subjects for presentation of new data and for a free interchange of ideas This type of endeavor is one of the most uniquely effective ways of accumulating new knowledge because the data presented are subjected to critical review and discussion No textbook or publication in journals can provide the type of critically evaluated information that comes from a small group is a mechanism for scientists to become meeting of this type Furthermore it acquainted or better acquainted with one another All of this is of course very provocative and supportive of high quality research one of the trademarks of the International Society of Hypertension The conference for this book publication was organized by Drs
