Most of the academic libraries create subject guides on their library web pages. These subject guides provide information and resources on either a specific topic or a specific course or on library services as a guide to users. Library guides may include text, print, or electronic materials. Some of these library guides provide information on databases available at the library, information on how to use and search these databases, links to library materials, and other help information such as Ask Us, FAQ entries, or important contact information. Library guides are well designed by professional librarians to help users start their research process and guide them to information sources they might not find themselves. This study was made to investigate the usage of academic subject guides in universities the United Arab Emirates.

Handbook of Research on Library Response to the COVID-19 Pandemic Holland, Barbara, 2021-03-19. Since the spread of COVID-19, conferences have been canceled, schools have closed, and libraries around the world are facing difficult decisions on which services to offer and how, ranging from minimal restrictions to full closures. Depending on the country, state, or city, a government may have a different approach, sometimes ordering the closure of all institutions, others indicating that it's business as usual, and others simply leaving decisions up to library directors. All libraries worldwide have been affected, from university libraries to public library systems and national libraries. Throughout these closures, libraries continue to provide services to their communities, which has led to an emerging area of research on library services, new emerging technologies, and the advancements made to libraries during this global health crisis. The *Handbook of Research on Library Response to the COVID-19 Pandemic* consists of chapters that contain essential library services and emerging research and technology that evolved and/or has continued during the COVID-19 pandemic, as well as the challenges and opportunities that have been undertaken as a result. The chapters provide in-depth research, surveys, and information on areas such as remote working, machine learning, data management, and the role of information during COVID-19. This book is a valuable reference tool for practitioners, stakeholders, researchers, academicians, and students who are interested in the current state of libraries during a pandemic and the future outlook.

Learning from Libraries that Use WordPress Kyle M. Jones, Polly-Alida Farrington, 2013. With its intuitive interface and open source development method, the WordPress web platform has emerged as a uniquely flexible content management system (CMS) with many library-related applications. In this book, Jones and Farrington, two web designer-librarians, explore the variety of ways libraries are implementing WordPress as a CMS, from simple out-of-the-box websites to large sites with many custom features. Emphasizing a library-specific perspective, the authors offer a brief history of WordPress, reviewing its genesis and sketching in some possible future directions. They analyze the software's strengths and weaknesses, spotlighting its advantages over other existing web publishing platforms, as well as discussing the limitations libraries have encountered. Presenting a variety of case studies offering first-hand examples, which detail why WordPress was selected, methods of implementation, and degree of customization, feedback from users, and reflections on usability. Discuss essential plug-ins, themes, and other specialized applications for library sites. This useful book shows how scores of libraries have used WordPress to create library websites that are both user-friendly and easy to maintain.
