bioremediation **University on the Border** Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall. The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution, idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally. The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border. The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution, the university. *Corrupted* Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities. He reveals the political economy at work and the intense competition for resources on campuses. He also provides interventions for these fragile institutions. Why do some universities seem to be in a constant state of turmoil and dysfunction? Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities. Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials, Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources, especially on campuses located in impoverished communities. It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never-ending run on the material such as money for infrastructure and symbolic, namely graduation certificates for sale, assets of these institutions. Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions. This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly.

Utilisation of South African Research on Higher Education Jan Botha, Gabriele Vilyte, 2021-10-26 The relationship between research on the one hand and policy practice on the other hand is complicated and collaboration between scholars in research on higher education (RHE) and institutional research (IR) practitioners is often lacking. This book marks a collaborative effort of a diverse range of South African RHE and IR scholars and asks the overarching questions: What do we know about the utilisation of South African research on higher education (SARHE) and its subset of research known as Institutional Research? How and by whom is this research used? The book begins by looking at the historical underpinnings of SARHE and delineating the shape and size of this body of research. This is followed by a series of case studies on South

African Higher Education institutions and governmental bodies investigating how when and by whom are research on higher education and institutional research used in the decision making of these organisations This book is the first of its kind in South Africa and sets out to lay the groundwork for further research into the use uptake and utilisation of RHE and IR in this country
