Advances in Computer, Information, and Systems Sciences, and Engineering Khaled Elleithy,Tarek Sobh,Ausif Mahmood,Magued Iskander,Mohammad A. Karim,2007-06-06 The conference proceedings of International Conference on Industrial Electronics Technology not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 50 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session The implemented conferencing technology starting with the submission review system and ending with the online conferencing capability allowed CISSE to conduct a very high quality fulfilling event for all participants See www.cissee2005.org sections IETA TENE EIAE

Methodologies Tools and Applications is a compendium of the latest academic material on investigations technologies and techniques pertaining to analyzing the synthesis and design of new materials Through its broad and extensive coverage on a variety of crucial topics such as nanomaterials biomaterials and relevant computational methods this multi volume work is an essential reference source for engineers academics researchers students professionals and practitioners seeking innovative perspectives in the field of materials science and engineering

Recovery of Values from Low-Grade and Complex Minerals Elvis Fosso-Kankeu, Bhekhe B. Mamba, Antoine F. Mulaba-Bafubiani, 2024-05-21 Recovery of Values from Low Grade and Complex Minerals The book elaborates on various physicochemical properties of minerals and technological developments to improve the recovery of metals while ensuring cost effectiveness and minimal environmental impact The mineral industry is undergoing significant cultural organizational and technological transformations to address some of the major limitations and challenges related to the environmental and productivity domains As far as productivity is concerned the decrease of high grade ores has been one of the stumbling blocks toward the achievement of maximum recovery of metals while on the other hand the complexity of minerals therein makes it difficult to profitably extract metals using only conventional methods This book presents eight specialized chapters that focus on the exploration of the complexity of minerals that are likely to negatively influence the recovery of values as well as the development of adequate technologies capable of improving the process of mineral concentration and or metal recovery from complex minerals in a sustainable manner It reviews the various physicochemical properties of minerals that are likely to pose a challenge during the attempt to recover values using conventional methods It also elaborates on the recent technological development that has been considered by researchers to improve the recovery of metals from gangue dominated minerals while ensuring cost effectiveness and minimal adverse environmental impact Audience This book will be of interest to academic researchers from the fields of mineral processing hydrometallurgy geochemistry environment chemistry engineering and professionals including mining plant operators environmental managers in the industries government regulatory bodies officers and environmentalists

Achieving sustainable cultivation of bananas Volume 2 Prof Gert H. J. Kema, Prof André Drenth, 2020-11-24 Focus on key issues in expanding the genetic base for Musa including

exploiting current collections of germplasm and collecting and evaluating wild Musa species and landraces Covers methods for improving fertility resistance and other traits in Cavendish Reviews the range of conventional and modern molecular techniques for breeding new banana varieties *ICTs and Higher Education in Africa*, 2007 This overview reviews existing national and international policies with regard to the use of Information and Communication Technologies ICTs to enhance teaching and learning within institutions of tertiary education Common areas of strength and of weakness with regard to educational technology readiness in the Partnership for Higher Education in Africa PHEA countries are explored The challenges to the deployment of ICT in tertiary education within the PHEA countries are outlined Finally lessons learned and possibilities for collaboration are highlighted

Sociology in South Africa R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology Providing a holistic picture of the subject both as it is taught in universities and as a field of research it reveals the trajectories of a discipline in a challenging socio political context With the support of historical and scientometric data it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature direction and foci of sociological research in the country The author shows how during the apartheid era sociology was professionally fragmented and divided along language and race lines It was however able to flourish with the advent of democracy in 1994 and has become a unique academic movement This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa

A composite index of quality of life for the Gauteng city-region: a principal component analysis approach Talita Greyling, The improvement of the quality of life of all South Africans is high on the agenda at national The National Planning Commission 2012 and regional levels of government The Gauteng Planning Commission 2012 and it is therefore important to develop an instrument that can measure this multi dimensional concept The need therefore exists for a composite index of quality of life with the ability to both track the quality of life of people over time and compare it across different demographic and socio economic groups Such a measure could identify those demographic and socio economic groups with low levels of quality of life and also highlight dimensions that need to be prioritised in order to improve the wellbeing of people In South Africa there are a limited number of quality of life indices and measures of wellbeing Indices that measure wellbeing nationally include the Quality of Life Index of Moller and Schlemmer 1983 the Living Standard Measure LSM Index produced by the South African Audience Research Foundation SAARF 2013 the South African Development Index of the South African Institute of Race Relations 2011 and the Everyday Quality of Life Index Higgs 2007 The following indices measure wellbeing at a regional level the Quality of Metropolitan City Life in South Africa Index Naude et al 2009 the Non Economic Quality of Life Index at Sub National Levels Rossouw Naude 2008 and the Quality of Life Index of the Gauteng City Region Observatory GCRO 2011 Although these quality of life indices make distinctive contributions to the study field the focus of these studies is often to measure only objective or subjective quality of

life or only economic or non economic quality of life rather than all of the above Furthermore many of the indices use equal weighting which does not necessarily reflect the priorities of the communities

Structuring Mass Higher Education David Palfreyman, Ted Tapper, 2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide

range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide
