Lattice Gauge Theory B. Bunk, K.H. Mutter, K. Schilling, 2012-12-06 This volume presents the contributions to the international workshop entitled Lattice Gauge Theory a Challenge in Large Scale Computing that was held in Wuppertal from November 4 to 7 1985 This meeting was the third in a series of European workshops in this rapidly developing field The meeting intended to bring together both active university research ers in this field and scientists from industry and research centers who pursue large scale computing projects on problems within lattice gauge theory These problems are extremely demanding from the point of view of both machine hardware and algorithms for the verification of the continuum fields theories like Quantum Chromodynamics in four dimensional Euclidean space time is quite cumbersome due to the tremendously large number of de grees of freedom Yet the motivation of theoretical physicists to exploit computers as tools for the simulation of complex systems such as gauge field theories has grown considerably during the past years In fact quite a few prominent colleagues of ours have even gone into machine building both in industry and research institutions more parallelism and more de dicated computer architecture are their design goals to help them boost the Megaflop rate in their simulation processes The workshop contained several interesting seminars with status reports on such supercomputer projects like the Italian APE by E Marinari the IBM project GF 11 by D Weingarten and the Danish projects MOSES and PALLAS by H Bohr Scientific and Technical Aerospace Reports ,1977 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database Chilton's Auto Repair Manual ,1975 Chilton Book Company,1974
