Hiller,2014 Rather than interpreting the Olympics as primarily a sporting event of international or national significance this book understands the Games as a civic project for the host city that serves as a catalyst for a variety of urban interests over a period of many years from the bidding phase through the

event itself Traditional Olympic studies have tended to examine the Games from an outsider's perspective or as something experienced through the print media or television In contrast the focus presented here is on the dynamics within the host city understood as a community of interacting individuals who encounter the Games in a variety of ways through support opposition or even indifference but who have a profound influence on the outcome of the Games as actors and players in the Olympics as a drama Adopting a symbolic interactionist approach the book offers a new interpretive model through which to understand the Olympic Games by exploring the relationship between the Games and residents of the host city Key analytical concepts such as framing dramaturgy the public realm and the symbolic field are introduced and illustrated through empirical research from the Vancouver 2010 Winter Games and it is shown how the social media and shifts in public opinion reflected interaction effects within the city By filling a clear lacuna in the Olympic Studies canon this book is important reading for anybody with an interest in the sociology of sport urban studies event studies or urban sociology

When Television was Young Paul Rutherford, 1990-01-01 A decade after the first Canadian telecasts in September 1952 TV had conquered the country Why was the little screen so enthusiastically welcomed by Canadians Was television in its early years more innovative less commercial and more Canadian than current offerings In this study of what is often called the golden age of television Paul Rutherford has set out to dispel some cherished myths and to resurrect the memory of a noble experiment in the making of Canadian culture He focuses on three key aspects of the story The first is the development of the national service including the critical acclaim won by Radio Canada the struggles of the CBC's English service to provide mass entertainment that could compete with the Hollywood product and the effective challenge of private television to the whole dream of public broadcasting The second deals with the wealth of made in Canada programming available to please and inform viewers even commercials receive close attention Altogether Rutherford argues Canadian programming reflected as well as enhanced the prevailing values and assumptions of the mainstream The final focus is on McLuhan's Question What happens to society when a new medium of communications enters the picture Rutherford's findings cast doubt upon the common presumptions about the awesome power of television Television in Canada Rutherford concludes amounts to a failed revolution It never realized the ambitions of its masters or the fears of its critics Its course was shaped not only by the will of the government the power of commerce and the empire of Hollywood but also by the desires and habits of the viewers

Hierarchical Organization in Society James Pooler, 2017-11-22 This title was first published in 2000 A hierarchy is an organization system that is structured in a tree-like manner with levels of status or authority stacked one above the other The classical and best known example of a hierarchy is probably the typical diagram that describes the structure of a company or business also known as the corporate ladder This text argues that hierarchies are one of the most important concepts we have in order to understand the world around us and looks at hierarchies in a wide variety of areas of interest to everybody such as companies educational systems transport systems retail stores corporations communities population migrations medical systems and many other real world phenomena From a Canadian perspective the text examines these hierarchies and their effects at a variety of scales It discusses how to understand the system around us and the ones in which we are immersed every day The central theme is that it is possible to get a better grip on the past present and future of the world if

it is viewed through an understanding of hierarchies **CHEK Republic** Diane Dakers, 2014-10-17 In 2009 Victoria's CHEK TV became the first employee owned television station in North America after corporate owner CanWest Global threatened to shut it down The David and Goliath story made national headlines and reawakened a belief in local independent broadcasting In the five years since the employee purchase of the station CHEK has weathered the challenges of independent ownership and remains proudly local in every sense of the word While the future of media is unpredictable and the feasibility of local television continues to be challenged CHEK Republic is at its core a success story chronicling the long history near downfall and rebirth of a truly one of a kind media outlet **Catalog of Copyright Entries, Third Series** Library of Congress.
