**Exploring Vancouver** Harold Kalman, Robin Ward, 2012-04-27 Vancouver's streetscapes and neighbourhoods have changed drastically in recent years. New buildings representing current architectural trends are mixing with and often replacing those of earlier eras and tastes and a maturing architectural melange is emerging. This book invites the reader to explore the city's continually evolving urban landscape in a highly readable yet authoritative guide to its architecture. In this completely updated edition of *Exploring Vancouver* with brand new entries and accompanying photographs, Harold Kalman and Robin Ward have divided the city including the North Shore, Richmond, Burnaby and New Westminster into fourteen areas, selecting buildings and structures in these neighbourhoods that represent the best examples of the new and old architecture. Each area is preceded by an informative introduction that provides historical context for the entries that follow. There are over 400 entries, each featuring a short description that combines architectural, historical and social commentary. The prose is lively as the authors consider the new and the old, the modest and the grand, the attractive and the not so attractive in a wide-ranging work that encompasses everything from heritage to monster homes. This book is designed as a walking tour guide with a map of each area showing the location of every entry. *A Social Geography of Canada* Guy M. Robinson, 2013-12-30 This collection of essays focuses on subjects which formed the basis of his life's work: the changing character of Canadian landscape and society and the urbanization of that society, including aspects of its historical evolution, its present spatial forms and current social issues. *The Mercantile Navy List and Maritime Directory* Great Britain. The four volumes of *The Birds of British Columbia* provide unprecedented coverage of this region's birds, presenting a wealth of information on the ornithological history, habitat, breeding habits, migratory movements, seasonality and distribution patterns of each of the 472 species of birds. This third volume, covering the first half of the passerines, builds on the authoritative format of the previous bestselling volumes. It contains 89 species, including common ones such as swallows, jays, crows, wrens, thrushes and starlings. The text is supported by hundreds of full-colour pictures, including unique habitat photographs, detailed distribution maps and beautiful illustrations of the birds, their nests, eggs and young. *The Birds of British Columbia* is a complete reference work for bird watchers, ornithologists and naturalists who want in-depth information on the province's regularly occurring and rare birds.
