1. Fungi are eukaryotic organisms means they have true nucleus which are enclosed in membranes.
2. They are non-vascular organisms. They do not have vascular system. Xylem and Phloem are absent.
3. Fungi have cell walls (plants also have cell walls, but animals have no cell walls).
4. There is no embryonic stage for fungi.

5. They reproduce by means of spores. There are sexual and asexual spores. Sexual spores are Oospores, Zygosporangia, Ascospores, Basidiospores, etc. and Asexual spores are Sporangiospores, Aplanospores, Zoospores, Conidia, etc.
6. Depending on the species and conditions both sexual and asexual spores may be produced.
7. They are typically non-motile.
8. Fungi exhibit the phenomenon of alteration of generation. They have both haploid and diploid stage.

## **Study Guide Section 2 Characteristics Of Fungi:**

A Guide to the Study of Basic Medical Mycology Kee Peng Ng, Shiang Ling Na, Tuck Soon Soo-Hoo, 2014-09-11 Mycotic diseases are gaining importance because of the increase in opportunistic fungal infections in patients whose immune systems are compromised. The identification of fungi isolated from clinical material has posed a variety of problems to many laboratories because of lack of expertise and experience especially in the identification of recently emerged rare fungi that had not been previously reported. A Guide to the Study of Basic Medical Mycology offers an overview of the basic characteristics of fungi frequently isolated from clinical specimens. This comprehensive guide developed by authors Kee Peng Ng, Tuck Soon Soo Hoo and Shiang Ling Na from the Department of Medical Microbiology, University Malaya Medical Centre, Malaysia, details the macro and microscopic features of each fungus through graphics and illustrations. Including specimens not often found in all teaching modules, A Guide to the Study of Basic Medical Mycology serves to help medical students identify and learn to deal with clinically important fungi and fungal pathogens. **Resources for Teaching Middle School Science** Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30. With age appropriate inquiry centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn; a list of accompanying materials; a reading level; and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and

periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents
