Environmental Assessment of Lightweight Electric Vehicles Patricia Egede, 2016-07-25 This monograph addresses the challenge of the environmental assessment of lightweight electric vehicles. It poses the question whether the use of lightweight materials in electric vehicles can reduce the vehicles environmental impact and compares the environmental performance of a lightweight electric vehicle LEV to other types of vehicles. The topical approach focuses on methods from life cycle assessment LCA and the book concludes with a comprehensive concept on the environmental assessment of LEVs. The target audience primarily comprises LCA practitioners from research institutes and industry but it may also be beneficial for graduate students specializing in the field of environmental assessment.
