Net Zero Energy Buildings Linda Reeder, 2016-03-31 This book presents 18 in depth case studies of net zero energy buildings low energy building that generate as much energy as they consume over the course of a year for a range of project types sizes and U S climate zones Each case study describes the owner s goals the design and construction process design strategies measurement and verification activities and results and project costs With a year or more of post occupancy performance data and other project information as well as lessons learned by project owners and developers architects engineers energy modelers constructors and operators each case study answers the questions What were the challenges to achieving net zero energy performance and how were these challenges overcome How would stakeholders address these issues on future projects Are the occupants satisfied with the building Do they find it comfortable Is it easy to operate How can other projects benefit from the lessons learned on each project What would the owners designers and constructors do differently knowing what they know now A final chapter aggregates processes to engage in and pitfalls to avoid when approaching the challenges peculiar to designing constructing and owning a net zero energy building By providing a wealth of comparable information this book which will flatten the learning curve for designing constructing and owning this emerging building type and improve the effectiveness of architectural design and construction **Architecture &**

Technology - Volume 7: Colliders Alexander Wu Chao, Weiren Chou, 2015-02-11 The idea of colliding two particle beams to fully exploit the energy of accelerated particles was first proposed by Rolf Wider e who in 1943 applied for a patent on the collider concept and was awarded the patent in 1953 The first three colliders AdA in Italy CBX in the US and VEP 1 in the then Soviet Union came to operation about 50 years ago in the mid 1960s A number of other colliders followed Over the past decades colliders defined the energy frontier in particle physics Different types of colliders proton proton proton antiproton electron positron electron proton electron ion and ion ion colliders have played complementary roles in fully mapping out the constituents and forces in the Standard Model SM We are now at a point where all predicted SM constituents of matter and forces have been found and all the latest ones were found at colliders Colliders also play a critical role in advancing beam physics accelerator research and technology development It is timely that RAST Volume 7 is dedicated to Colliders

Advanced Cutting Tool Technology and Machine Processes Riyadh A. Al-Samarai, Yarub Al-Douri, 2025-09-22 Today's industry heavily relies on advanced cutting tool technology and manufacturing techniques to enhance quality and efficiency in production This undergraduate level textbook is dedicated to exploring the latest developments that enhance tool performance lower costs and boost productivity The mission of this textbook is to provide readers with a thorough understanding of cutting edge technologies and methods used in cutting tools and industrial processes Advanced Cutting Tool Technology and Machine Processes steps into the world of modern cutting tools used in the metallurgical industry Each tool is meticulously dissected showcasing its distinctive features and methods of operation The text explores advanced metal cutting and processing techniques including laser water and plasma cutting By covering these cutting edge methods students and professionals can remain at the forefront of industry advancements In addition to detailed tool descriptions this textbook offers practical guidance on utilizing tools effectively and safely as well as tips on tool

maintenance to ensure longevity and peak performance To enhance comprehension this textbook incorporates exercise problems case studies and practical examples that illustrate how theoretical knowledge is applied in real world scenarios This hands on approach aids in the development of problem solving skills and the practical application of concepts Lastly this textbook provides comprehensive information on the properties of various metals and how to handle them effectively This knowledge is crucial in selecting the appropriate tools for each type of metal guaranteeing precision and efficiency in cutting processes This textbook is ideal for undergraduate students in production materials industrial mechatronics marine mechanical and manufacturing engineering programs and is also useful for graduate programs related to higher level machining topics as well as professional engineers and technicians Figure slides and a solutions manual for available for qualified textbook adoptions

Design of Active Key Interfaces in Fuel Cells Toshiyuki Mori, San Ping Jiang, Zongping Shao, Michihisa Koyama, Zhipeng Li, Takayoshi Tanji, Roger Wepf, Fei Ye, 2025-01-29 This book focuses on the multidisciplinary teamwork for the design of key interfaces in fuel cell devices It covers the fabrication modelling and operando microanalysis sections in each chapter Also each chapter in the book consists of the introduction of basic theory representative experimental results and future prospects in each field The book is an edited volume intended to serve as an introductory textbook in multidisciplinary research work for the design and development of fuel cells To fully enjoy the multidisciplinary research activities in fuel cell field the beginners need to learn the basic knowledge and experimental data in each field Compared with the published introductory textbooks in the field of science and engineering of fuel cells this book has the following advantages Firstly it is an introductory textbook of multidisciplinary work for the design and development field of intermediate temperature IT solid oxide fuel cells IT SOFCs and high temperature polymer electrolyte fuel cells HT PEFCs And at the same time this book is convenient for practical research implementation in R D of those IT SOFC and HT PEFC devices Secondly recent research topics with sufficient references are included in each chapter Scientists and engineers in the fuel cell field will obtain useful knowledge in critical review chapters in the fabrication modeling and operando microanalysis fields Finally experimental results are closely combined with the cutting edge of scientific research work in the IT SOFC and HT PEFC materials and devices field For all these reasons this book is a useful start up in multidisciplinary work for R D of IT SOFC and HT PEFC devices
