Olckers, Llewellyn van Zyl, Leoni van der Vaart, 2017-11-27 This book shares the theoretical advancements that have been made regarding psychological ownership since the development of the construct and specifically the practical applications within multi-cultural and cross-cultural environments. Enriched by empirical data and case studies by subject specialists in the field, this book serves as a cutting-edge benchmark for human resource management specialists, industrial psychologists as well as students in positive organizational psychology and professionals in other fields. This book follows an in-depth view of the most recent research trends in psychological ownership. Offering practical tools of how the psychological ownership of employees could be developed in the workplace to not only enhance the performance of organisations but to increase the commitment of employees and influence the intentions of skilled employees to remain with their organisations. **Water**

Scarcity and Conflict in African River Basins Mahlakeng Khosi Mahlakeng, 2023-03-31 The book presents a critical and comparative analysis of the hydropolitical landscape of African transboundary river basins which for much of the past century have been affected by water scarcity. River and lake basins can become a source of tension and conflict due to a complicated mix of environmental, demographic, diplomatic, historical and geopolitical factors. This book, however, specifically focuses on the important and often underlooked role played by scarcity in generating or exacerbating conflicts in shared river basins. Asserting that transboundary river basins tie states into a web of interdependence, this book raises awareness of how water scarcity or the depletion of water resources complicates this relationship as nations are forced to look beyond their own borders to meet the demand for water to satisfy multiple needs. Taking a comparative approach, it examines three shared basins: the Orange-Senqu, the Nile and the Niger River basins. While situated in different regions, all three basins are marked by serious environmental challenges that are detrimental to combustible hydropolitics over such shared water resources and they provide fascinating insights into the links between climate variability and change, water resources, human security, conflict, adaptation and regime capacity. Overall, this book argues that conflict over transboundary resources can be

prevented given the establishment of norms rules and the role of external actors that help regulate state behaviour and control their impacts This book will be of great interest to students and scholars of water resource management hydropolitics environmental conflict resource scarcity and international relations It will also be of interest to policymakers involved in transboundary water resource governance Biodiversity Litigation Guillaume Futhazar,Sandrine Maljean-Dubois,Jona Razzaque,2023 This book promotes the concept of Biodiversity Litigation as a common notion of environmental law and investigates litigation in a variety of countries and from various perspectives It opens the space for more creative legal thinking when dealing with and analysing biodiversity related disputes **Water Management in Megacities** Cecilia Tortajada,Olli Varis,Asit K. Biswas,Jan Lundqvist,2013-09-13 Efficient and equitable water wastewater and stormwater management for the megacities is becoming an increasingly complex task The special issue will focus on water management in its totality for megacities including their technical social economic legal institutional and environmental dimensions through a series of specially invited case studies from different megacities of the world At present around one out of two of the earth s 6 3 billion people live in urban areas Each year the world population grows by around 80 millions Practically all of this growth is urban primarily due to migration World s urban population is expected to reach 5 billion by 2030 which is nearly 2 3rd more than in 2000 and would mean that 60% of world s population will live in urban areas The case studies analysed include some of the most interesting and challenging megacities of this planet Dhaka Istanbul Jakarta Johannesburg M xico City Riyadh and S o Paulo They assess different aspects of how water is intermingled in the overall development milieu The special issue will considers the magnitudes nature and extent of the present and future challenges and how these could be meet in socially acceptable and cost effective ways The contributors are all acknowledged water experts from different parts of the world This book was previously published as a special issue of the International Journal of Water Resource s Development **Lesser Flamingos** Lothar Krienitz,2018-12-31 This book provides insights into the fascinating life of the Lesser Flamingo *Phoeniconaias minor* and describes how this enigmatic bird has adapted to the extreme conditions of tropical soda lakes and can even withstand the caustic effects of brine However humans are increasingly disrupting the natural cycles of these wetlands and for these pink birds characteristic of these salt lakes it is becoming more and more difficult to find suitable habitats food and breeding grounds Their fate is considered a cautionary example of man s dealings with nature Will the Lesser Flamingo survive in a man made world Flamingos are considered to be an embodiment of the Phoenix and the author interweaves his personal experiences with and observations of the flamingos unusual habitats with the Phoenix motif in order to stimulate reflection on the circle of life Written in an accessible style that combines science biological information and the author s own travels and fieldwork the book also includes a wealth of captivating images As such it offers a unique resource for biologists and nature loving Africa and Asia enthusiasts alike *Ecological Informatics* Friedrich Recknagel,William K. Michener,2017-09-21 This book introduces readers to ecological informatics as an emerging

discipline that takes into account the data intensive nature of ecology the valuable information to be found in ecological data and the need to communicate results and inform decisions including those related to research conservation and resource management At its core ecological informatics combines developments in information technology and ecological theory with applications that facilitate ecological research and the dissemination of results to scientists and the public Its conceptual framework links ecological entities genomes organisms populations communities ecosystems landscapes with data management analysis and synthesis and communicates new findings to inform decisions by following the course of a loop In comparison to the 2nd edition published in 2006 the 3rd edition of Ecological Informatics has been completely restructured on the basis of the generic conceptual framework provided in Figure 1 It reflects the significant advances in data management analysis and synthesis that have been made over the past 10 years including new remote and in situ sensing techniques the emergence of ecological and environmental observatories novel evolutionary computations for knowledge discovery and forecasting and new approaches to communicating results and informing decisions

Forging Solidarity Astrid von Kotze, Shirley Walters, 2017-04-13 Animating this book is a twofold question In what ways are adult and popular educators responding to various harsh economic political cultural and environmental conditions In doing so are they planting seeds of hope for and imaginings of alternative futures which can connect individuals and communities locally and globally to achieve economic ecological and social justice The book illustrates how transformative politics of solidarity often involve actors across vastly different backgrounds Solidarity is therefore a political relationship that is forged through particular struggles situated in place and time across power differentials The authors put popular education to work by describing and

analysing their strategies and approaches They do so using accessible language and engaging styles Popular education is a medium for dreaming for imagining other futures It is also essential for countering the wilful spreading of fake news and propagation of ignorance Pedagogies of solidarity are necessary to building connections amongst people at a time when competitive individualism and alienation are rampant Forging solidarity with and amongst communities is a means towards that end and indeed an end in itself Corporate mines and agribusiness poison the water we drink the air we breathe and the food we eat Together with their political proxies they destroy the earth and her peoples too many are killed because of their military economic religious and information wars How do we stand up for ourselves and the earth that nourishes us against this global system Forging Solidarity shares inspiring stories that feed our deep connection and power Pregs Govender Author of Love and Courage A Story of Insubordination Forging Solidarity is a critical and timely collective intervention that ponders prods pokes and plays in the most generative ways In so doing it invites us to continue deepening our engagements with questions of responsibility and justice in relation to education everywhere Richa Nagar author of Muddying the Waters Co authoring Feminisms across Scholarship and Activism This book inspires people to realize that not fighting against socio economic injustices is to side with oppressors Ntombi Nyathi Programme Director of Training for Transformation

Social Constructions of Water Quality in South Africa Suvania Naidoo,2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government

Seismic Characterization of Carbonate Platforms and Reservoirs J. Hendry,P. Burgess,D. Hunt,X. Janson,V. Zampetti,2021-08-17 Modern seismic data have become an essential toolkit for studying carbonate platforms and reservoirs in impressive detail Whilst driven primarily by oil and gas exploration and development data sharing and collaboration are delivering fundamental geological knowledge on carbonate systems revealing platform geomorphologies and how their evolution on millennial time scales as well as kilometeric length scales was forced by long term eustatic oceanographic or

tectonic factors Quantitative interrogation of modern seismic attributes in carbonate reservoirs permits flow units and barriers arising from depositional and diagenetic processes to be imaged and extrapolated between wells This volume reviews the variety of carbonate platform and reservoir characteristics that can be interpreted from modern seismic data illustrating the benefits of creative interaction between geophysical and carbonate geological experts at all stages of a seismic campaign Papers cover carbonate exploration including the uniquely challenging South Atlantic pre salt reservoirs seismic modelling of carbonates and seismic indicators of fluid flow and diagenesis Geomorphology in the Anthropocene Andrew S. Goudie, Heather A. Viles, 2016-10-10 The Anthropocene is a major new concept in the Earth sciences and this book examines the effects on geomorphology within this period Drawing examples from many different global environments this comprehensive volume demonstrates that human impact on landforms and land forming processes is profound due to various driving forces including use of fire extinction of fauna development of agriculture urbanisation and globalisation and new methods of harnessing energy The book explores the ways in which future climate change due to anthropogenic causes may further magnify effects on geomorphology with respect to future hazards such as floods and landslides the state of the cryosphere and sea level The book concludes with a consideration of the ways in which landforms are now being managed and protected Covering all major aspects of geomorphology this book is ideal for undergraduate and graduate students studying geomorphology environmental science and physical geography and for all researchers of geomorphology

Modern Trends in Diatom Identification Gabriel Cristóbal, Saúl Blanco, Gloria Bueno, 2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition techniques for diagnostic tools e g environmental monitoring networks early warning systems to improve the management of water resources and decision making processes Describing the entire workflow of a bioindicator system from capture analysis and identification to the determination of quality indices this book provides insights into the current state of the art in automatic identification systems in microscopy *Usability and User Experience* Tareq Ahram and Christianne Falcão, 2023-07-19 Proceedings of the 14th International Conference on Applied Human Factors and Ergonomics AHFE 2023 July 20 24 2023 San Francisco USA *Non-Western Identity* Byron G.
