Bioethics Education in a Global Perspective Henk A.M.J. ten Have, 2014-09-25 This book critically analyses experiences with bioethics education in various countries across the world and identifies common challenges and interests. It presents ethics teaching experiences in nine different countries and the basic question of the goals of bioethics education. It addresses bioethics education in resource-poor countries as the conditions and facilities are widely different and set limits and provide challenges to bioethics educators. Further, the question of how bioethics education can be improved is explored by the contributors. Despite the volume of journal publications, agreement on bioethics education is rather limited. There are only a few examples of core curricula demonstrating consensus on the contents, goals, methods, and assessment of teaching programs. We need to ask: How can agreement on the best modalities of bioethics education be promoted?
