Bowen and Sarah Levin disentangle the admissions and academic experiences of recruited athletes walk on athletes and other students In a field overwhelmed by reliance on anecdotes the factual findings are striking and sobering Anyone seriously concerned about higher education will find it hard to wish away the evidence that athletic recruitment is problematic even at those schools that do not offer athletic scholarships Thanks to an expansion of the College and Beyond database that resulted in the highly influential studies The Shape of the River and The Game of Life the authors are able to analyze in great detail the backgrounds academic qualifications and college outcomes of athletes and their classmates at thirty three academically selective colleges and universities that do not offer athletic scholarships They show that recruited athletes at these schools are as much as four times more likely to gain admission than are other applicants with similar academic credentials The data also demonstrate that the typical recruit is substantially more likely to end up in the bottom third of the college class than is either the typical walk on or the student who does not play college sports Even more troubling is the dramatic evidence that recruited athletes underperform they do even less well academically than predicted by their test scores and high school grades Over the last four decades the athletic academic divide on elite campuses has widened substantially This book examines the forces that have been driving this process and presents concrete proposals for reform At its core Reclaiming the Game is an argument for re establishing athletics as a means of fulfilling instead of undermining the educational missions of our colleges and universities

Training the Body for China Susan Brownell, 1995-08. Competing in the 1986 National College Games of the People's Republic of China, Susan Brownell earned both a gold medal in the heptathlon and fame throughout China as the American girl who won glory for Beijing University. Now an anthropologist, Brownell draws on her direct experience of Chinese athletics in this fascinating look at the culture of sports and the body in China. *Training the Body for China* is the first book on Chinese sports based on extended fieldwork by a Westerner. Brownell introduces the notion of body culture to analyze Olympic sports as one element in a whole set of Chinese body practices: the old people's disco dancing craze, the new popularity of bodybuilding, following reluctant official acceptance of the bikini, mass calisthenics, martial arts, military discipline, and more. Translating official and dissident materials into English for the first time and drawing on performance theory and histories of the body, Brownell uses the culture of the body as a focal point to explore the tensions between local and global organizations, the traditional and the modern, men and women. Her intimate knowledge of Chinese social and cultural life and her wide range of historic examples make *Training the Body for China* a unique illustration of how gender, the body, and the nation are interlinked in Chinese culture. *Public Papers of the Presidents of the United States*, United States, President, 2003. Containing the public messages, speeches, and statements of the President, 1956-1992. George W.
