WEST BEND's Electric Ovenette is an amazingly versatile appliance consisting of 13 pieces and including accessories designed to handle most any baking or roasting assignment. From cover to base, the Electric Ovenette is a gleaming example of the widely recognized West Bend quality.

The cover is made of durable aluminum equipped with a thermometer. The base has a chrome plated steel bottom and a stainless steel top, specially tempered to prevent discoloration. The rack is of long-lasting nickel plated steel.

Pie pan, cake pan, and roasting pan have 8-inch inside top diameters. There are 7 muffin cups for medium-sized muffins. The heating unit is a double-coiled element with a long-life thermostat.

GENERAL INSTRUCTIONS

BEFORE USING

1. Wipe electric base thoroughly with damp cloth. The top of the base is straw colored as a result of special tempering and preheating. When the base is heated for the first time, there may be a small amount of smoke and odor caused by the presence of manufacturing oils. Do not immerse electric base in water.
2. Remove thermometer from cover. Wash cover, rack and insert pans in clean, hot suds to remove all traces of manufacturing oils. Rinse and wipe dry.

HOW TO USE

1. Place Electric Ovenette on hot pad or asbestos mat to protect counter or cabinet surfaces while Ovenette is in use.
2. Always use rack when baking or roasting.
3. Adjust cover securely over the base. Preheat Ovenette as directed in each recipe to the recommended baking temperatures. The thermometer in the cover indicates the temperatures from 200° F. to 500° F.
4. After the Ovenette is preheated to the desired temperature, lift cover straight up just high enough to place food on rack. Replace cover quickly to conserve heat.
5. Preheat the Ovenette exactly as recommended in the recipes before baking or roasting. There will be a temperature drop of 50 degrees to 100 degrees when the cover is lifted and the cold food added. In most recipes, the Ovenette is preheated well above the actual baking temperature. Some foods may be started in a cold Ovenette.
