Netcentric System of Systems

Engineering with DEVS Unified Process Saurabh Mittal, José L. Risco Martín, 2018-09-03 In areas such as military security aerospace and disaster management the need for performance optimization and interoperability among heterogeneous systems is increasingly important Model driven engineering a paradigm in which the model becomes the actual software offers a promising approach toward systems of systems SoS engineering However model driven engineering has largely been unachieved in complex dynamical systems and netcentric SoS partly because modeling and simulation M S frameworks are stove piped and not designed for SoS composability Addressing this gap Netcentric System of Systems Engineering with DEVS Unified Process presents a methodology for realizing the model driven engineering vision and netcentric SoS using DEVS Unified Process DUNIP The authors draw on their experience with Discrete Event Systems Specification DEVS formalism System Entity Structure SES theory and applying model driven engineering in the context of a netcentric SoS They describe formal model driven engineering methods for netcentric M S using standards based approaches to develop and test complex dynamic models with DUNIP The book is organized into five sections Section I introduces undergraduate students and novices to the world of DEVS It covers systems and SoS M S as well as DEVS formalism software modeling language and DUNIP It also assesses DUNIP with the requirements of the Department of Defense s DoD Open Unified Technical Framework OpenUTF for netcentric Test and Evaluation T E Section II delves into M S based systems engineering for graduate students advanced practitioners and industry professionals It provides methodologies to apply M S principles to SoS design and reviews the development of executable architectures based on a framework such as the Department of Defense Architecture Framework DoDAF It also describes an approach for building netcentric knowledge based contingency driven systems Section III guides graduate students advanced DEVS users and industry professionals who are interested in building DEVS virtual machines and netcentric SoS It discusses modeling standardization the deployment of models and simulators in a netcentric environment event driven architectures and more Section IV explores real world case studies that realize many of the concepts defined in the previous chapters Section V outlines the next steps and looks at how the modeling of netcentric complex adaptive systems can be attempted using DEVS concepts It touches on the boundaries of DEVS formalism and the future work needed to utilize advanced concepts like weak and strong emergence self organization scale free systems run time modularity and event interoperability This groundbreaking work details how DUNIP offers a well structured platform independent methodology for the modeling and simulation of netcentric system of systems **SDL**

2001: Meeting UML Rick Reed, Jeanne Reed, 2003-06-29 This volume contains the papers presented at the Tenth SDL Forum Cop hagen SDL is the Specification and Description Language rst standardized by the world telecommunications body the International Telecommunications Union ITU more than 20 years ago in 1976 While the original language and domain of application has evolved significantly the foundations of SDL as a graphical state transition and process communication language for real time systems have remained Today SDL has also grown to be one notation in the set of unified modelling

languages recommended by the ITU ASN 1 MSC SDL ODL and TTCN that can be used in methodology taking engineering of systems from requirements capture through to testing and operation The SDL Forum is held every two years and has become the most important event in the calendar for anyone involved in SDL and related languages and technology The SDL Forum Society that runs the Forum is a non profit organization whose aim it is to promote and develop these languages

Model-Based Software Performance Analysis Vittorio Cortellessa, Antiniscia Di Marco, Paola Inverardi, 2011-05-05

Poor performance is one of the main quality related shortcomings that cause software projects to fail Thus the need to address performance concerns early during the software development process is fully acknowledged and there is a growing interest in the research and software industry communities towards techniques methods and tools that permit to manage system performance concerns as an integral part of software engineering Model based software performance analysis introduces performance concerns in the scope of software modeling thus allowing the developer to carry on performance analysis throughout the software lifecycle With this book Cortellessa Di Marco and Inverardi provide the cross knowledge that allows developers to tackle software performance issues from the very early phases of software development They explain the basic concepts of performance analysis and describe the most representative methodologies used to annotate and transform software models into performance models To this end they go all the way from performance primers through software and performance modeling notations to the latest transformation based methodologies As a result their book is a self contained reference text on software performance engineering from which different target groups will benefit professional software engineers and graduate students in software engineering will learn both basic concepts of performance modeling and new methodologies while performance specialists will find out how to investigate software performance model building
