evolutionary uniformitarian assumptions used by most geologists and instead interprets compelling new geological and observed field data within the biblical framework for the earth's history. He also demonstrates that fossils were catastrophically buried in sedimentary layers being deposited rapidly on a global scale on the continental plates derived from the violent rifting apart of the original supercontinent. His work demolishes radiometric dating, the icon of the millions of years dogma, and builds a thoroughly powerful case for a young earth that explains many geological features such as varves, evaporites, coal, oil, chalk, granites, and more that biblical skeptics sadly have used to scoff at God's Word. The Programme for International Student Assessment (PISA) is a highly influential instrument for monitoring the quality of education systems and provides a strong evidence base for informed policy making and education research. PISA also has a proven potential to trigger reforms and stimulate stakeholder involvement in the process. Notwithstanding the importance of its ranking, the full strength of PISA unfolds when data it delivers is utilised in the national policy domain. Linking PISA outcomes and policy choices and monitoring the impact on education quality is thereby a demanding task which requires sound analytical capacity and also knowledge of the strengths and weaknesses of the respective education system. The OECD Directorate for Education addresses the demand of non-member economies for policy support in understanding and analysing PISA data in the broader context of education system management and policy formulation. The present report was prepared to help the authorities of the Kyrgyz Republic better understand the reasons for the dramatically low performance of Kyrgyz students in the 2006 PISA survey despite significant resources and efforts invested in education by schools, parents, and government. The report reveals that a number of policy areas are in need of urgent attention and recommends ways to close the currently existing gap between aspirations and education reform achievement. *Current Law Index*, 1985
