nuclear disarmament and d tente that started in earnest in the mid 1950s While some of the assembled writings echo harsh  
prior criticism of Soviet expansionism and dictatorship others register growing qualms about the recklessness of American  
foreign policy and the baneful effects on civil liberties of anti communist hysteria inside the United States Whether  
continuing to push for western rearmament or highlighting in a more placatory vein the folly of the Cold War s divisions and  
rival fanaticisms Russell s paramount objective was avoiding a war that threatened global catastrophe Suspended between

typically common sense guidance for living well in a constant flow of newspaper and magazine articles letters to editors radio  
broadcasts and discussions and of special note a Nobel Prize acceptance speech Russell also completed two lecture tours of

this standardization by cramming or cheating others embraced the hope that such tests rewarded not only knowledge but also merit Written with humour Making a Grade looks at how standardized testing practices quietly appeared and then spread worldwide This book situates mass exams marks and credentials in an emerging paper based meritocracy arguing that such exams often first appeared as cameras to neutrally record achievement and then became engines to change education as people tailored their behaviour to fit these tests Taking the perspectives of both examiners and examinees Making a Grade claims that our own culture s desire for accountability through objective testing has a long history
