2012 GCSE English results Great Britain: Parliament: House of Commons:

Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do Disrupting Boundaries in Education and Research Suzanne Smythe,Cher Hill,Margaret MacDonald,Diane Dagenais,Nathalie Sinclair,Kelleen Toohey,2017-08-17 In Disrupting Boundaries in Education and Research six educational researchers explore together the potentialities of transdisciplinary research that de centres human behaviour and gives materiality its due in the making of educational worlds The book presents accounts of what happens when researchers think and act with new materiality and post human theories to disrupt boundaries such as self and other human and non human representation and objectivity Each of the core chapters works with different new materiality concepts to disrupt these boundaries and to consider the emotive sensory nuanced material and technological aspects of learning in diverse settings such as in mathematics and learning to swim discovering the bio products of eco sustainable building making videos and contending with digital government and its alienating effects When humans are no longer at the centre of the unfolding world it is both disorienting and exhilarating This book is an invitation to continue along these paths **Validity, Reliability and Efficiency of Comparative Judgement to Assess Student Work** Sven De Maeyer,Tine Van Daal,Renske Bouwer,Marije Lesterhuis,Eva Hartell,2023-01-13 *Teachers Matter - But How?* Ninni Wahlström,Daniel Alvunger,Daniel Sundberg,2019-12-18 Global processes are transforming educational policy around the world in complex ways with different implications for different local arenas Over the last two decades a global neoliberal policy paradigm has emerged placing the teacher at its centre Two well known examples are the OECD report on education and training policy *Teachers Matter* and the McKinsey Company report entitled *How the World's Best Performing School Systems Come Out on Top* It now seems more important than ever to highlight some alternatives that might contribute to a broader understanding of the meaning of being a teacher In a time of standardised performance and accountability this special issue raises critical questions about the space for teachers agency and teachers as curriculum

agents The different articles from some of our most distinguished researchers in the field provide essential perspectives on the question of where when and how teachers matter Our interest is not primarily to understand the scope of teachers agency but rather to understand what becomes important for teachers in their everyday activities such as teaching students handling educational norms and rules working in a local as well as a global society etc A common theme throughout the articles is that teachers matter in spaces where they can act as moral subjects in their profession in the present drawing on collective and individual experiences of the past whilst imagining a desired future This book was originally published as a special issue of the Journal of Curriculum Studies
