Government Managing Risk Bruce Chapman,2006-09-27 Higher education rates are increasing throughout the Western world yet at the same time government budgets face increasing constraints. This has ensured that the importance of student support is recognized in many countries. In recent years there has been a world-wide movement towards the use of income-contingent loans (ICL) for higher education. ICLs are now used in six countries following the Australian innovation of 1989 with the governments of many more countries looking very seriously at the model. This impressive new book by Bruce Chapman analyzes ICLs particularly their use in supporting students, exploring the experiences of a number of other countries adopting them. Chapman presents analysis of a number of disparate case studies to illustrate how ICLs can aid risk management policy reforming in both progressive and administratively feasible ways. This book describes, examines and promotes an exciting new role for the public sector as a manager of risk and argues that ICLs have enormous potential to change the extent and nature of social and economic activities. With the author's experience in the design and implementation of the Australian student financial support schemes, this is a knowledgeable, informative and enlightening book that will be useful to researchers, students and policy makers alike. Education on the Lives of Young South Africans Jennifer Case, Delia Marshall,2018-02-09 Around the world more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture and costing of public higher education abound from student activists, academics, parents, civil society and policy makers. We know from macro research that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people six years after they began their university studies. It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities. **Going to**
