Self-Concept Essay

Interpersonal communication is probably one of the most, if not the most, important and successful skill that has to be learned and used effectively by any person who is really going to do it in business. This skill will ensure that you will build and maintain relationships with people that is positive and mutually beneficial, thus ensuring success in any form of business that you pursue. However, considering what you think of yourself is what you are going to project out there. Therefore being self-aware will be an extremely important factor in the interpersonal communication of any type. Further down we'll see how self-concept influences interpersonal relationships. Why is it so?

A person that is used to be selfless, but only to some extent, but the selfless as a human being in general, is not only that in their business, but also that in their personal life. The same factor that, though ensuring that everything in their life is correct and up to standard, in the business world people who are not sure in themselves do not last long. For instance, if you were asked by your boss and were worried for an error in the report when you didn't make and you are not able to communicate with her in a certain self-assured way you are going to be punished for nothing, only due to the fact that you were not sure in yourself. Some experts have observed that individuals that are high in self-esteem are more confident and more competent (Koriat, 2006). Being entirely sure of yourself is a key element in the interpersonal communication, especially in the competitive world of today's companies.

In most cases, interest in interpersonal communication has increased (Joshi, 2009). Therefore, knowing how to show your true self and be ready in face of the difficulties and obstacles of the business world, are key to survive in our position and context in general, and the self, consequently, is a key element and personal strength.

Hage,Dietmar von der Pfordten,2009-08-24 During the last decades legal theory has focused almost completely on norms

rules and arguments as the constitutive elements of law Concepts were mostly neglected The contributions to this volume try to remedy this neglect by elucidating the role concepts play in law from different perspectives A main aim of this volume is to initiate a debate about concepts in law ke Fr ndberg gives an overview of the many different uses of concepts in law and shows amongst others that concepts in the law should not be confused with the role of concepts in descriptions of the law Dietmar von der Pfordten criticizes the restriction to norms as parts of the law in contemporary legal theory by questioning what concepts are and what their function is both in general and in legal conceptual schemes Giovanni Sartor assumes the inferential analysis of meaning proposed by Alf Ross in his ground breaking paper T t and addresses the question how possession of a concept including the rules defining it is possible without endorsing these rules Jaap Hage argues that 1 legal status words such as owner have a meaning because they denote things or relations in institutional reality 2 the meaning of these words consists in this denotation relation 3 knowledge of this meaning presupposes knowledge of the rules governing these words Torben Spaak contributes to this volume with an exemplary analysis of one of the most central concepts of the law namely that of a legal power Lorenz K hler discusses the role of concepts in determining the scope of application of legal rules and raises from this perspective the question to what extent legal concept formation can be arbitrary Ralf Poscher argues that as soon as a concept is used in stating the law the precise scope of application of this concept has become a legal matter This means that the use of moral concepts in the law does not automatically lead to a moral import into the law Dennis Patterson holds that Hart s concept of law can be understood as a so called practice theory and provides an overview of such a theory
