**The Indo-European Syllable** Andrew Byrd, 2015-06-02 In *The Indo European Syllable* Andrew Miles Byrd investigates the process of syllabification within Proto Indo European PIE revealing connections to a number of seemingly unrelated phonological processes in the proto language Drawing from insights in linguistic typology and synchronic theory he makes two significant advances in our understanding of PIE phonology First by analyzing securely reconstructable consonant clusters at word s edge he devises a methodology which allows us to predict which types of consonant clusters could occur word medially in PIE Thus a number of previously disconnected phonological rules can now be understood as being part of a conspiracy motivated by violations in syllable structure Second he uncovers evidence of morphological influence within the syllable created by processes such as quantitative ablaut These advances allow us to view PIE as a synchronic grammar one which can be described by and contribute to modern linguistic theory
