**Children's Environmental Rights Under International and EU Law** Francesca Ippolito, 2022-11-07 This book is dedicated to a topic which has for a long time lacked the attention it deserves within the academic world It intends to address in a coherent and comprehensive manner the problem of the environmental rights of the child which are not identical to the ones of adults whose environmental rights have been appraised from a general point of view In the absence of any international law instrument explicitly granting a child the right to a clean environment drawing on an extensive and

original analysis of the UN Convention on the Rights of the Child and the practice of its monitoring body this book undertakes an assessment of the extent to which these challenges may be overcome through a greater engagement between international law on the rights of the child and international environmental law The result is the first comprehensive study on the manner in which these two mutually reinforcing legal regimes can interact to strengthen the protection of children's environmental human rights at stake in the increased strategic environmental and climate litigations at both the national and international level The book is recommended reading for amongst others policy makers international environmental lawyers and human rights lawyers and practitioners Additionally lecturers students and researchers from a range of disciplines will also gain from seeing how new legal scholarship and intertwined branches of international law contribute to the continual development of the living rights of the human rights conventions Francesca Ippolito is Associate Professor of International Law in the Department of Political and Social Science of the University of Cagliari Italy She holds the Jean Monnet Chair on European Climate of Change REACT for 2021-2024

**Endkampf** Stephen G. Fritz, 2004-10-08 This thoroughly researched and superbly written study examines the final days of WWII combat within Germany during the occupation of Franconia WWII History At the end of World War II Gen Dwight D Eisenhower turned US forces toward the Franconian region of Germany ordering them to cut off and destroy German units before they could escape into the Alps Opposing this advance were German forces headed by SS Gruppenführer Max Simon a committed National Socialist who advocated merciless resistance Caught in the middle were the people of Franconia Historians have largely overlooked this period of violence and terror but it provides insight into the chaotic nature of life while the Nazi regime was crumbling Neither German civilians nor foreign refugees acted simply as passive victims caught between two fronts Throughout the region people pressured local authorities to end the senseless resistance Others sought revenge for their tribulations in the liberation that followed Stephen G Fritz examines the predicament and perspective of American GI's German soldiers and officials and the civilian population Endkampf is a gripping portrait of the collapse of a society and how it affected those involved whether they were soldiers or civilians victors or vanquished perpetrators or victims

participation in international human rights law as a whole The book will be an invaluable resource for academics researchers and policy makers working in the area of international human rights law      *International Child Law* Trevor Buck,2020-09-10 International Child Law examines the international laws for children at both a global and a regional level In particular the UN Convention on the Rights of the Child is described and critically assessed while at the regional level the child in Europe is examined and how far the ECHR is engaged as a vehicle to progress childrens rights Other key issues increasing regulated by international child law are spotlighted child labour child abduction and inter country adoption This book provides the reader with a sound understanding of the international law framework and issues relating to children and is a useful resource to those undertaking advanced study and or research in this area      Drug Safety Evaluation Shayne Cox Gad,2016-12-01 This practical guide presents a road map for safety assessment as an integral part of the development of new drugs and therapeutics Helps readers solve scientific technical and regulatory issues in preclinical safety assessment and early clinical drug development Explains scientific and philosophical bases for evaluation of specific concerns including local tissue tolerance target organ toxicity and carcinogenicity developmental toxicity immunogenicity and immunotoxicity Covers the development of new small and large molecules generics 505 b 2 route NDAs and biosimilars Revises material to reflect new drug products small synthetic large proteins and cells and tissues harmonized global and national regulations and new technologies for safety evaluation Adds almost 20% new and thoroughly updates existing content from the last edition

and desirable and that without such commitments only pyrrhic victories would be won in the fight to eradicate the scourge of the twenty first century Given the importance of the issue of human trafficking and its inescapable impact on victims families communities nations regions and the international community as a whole this monograph will serve as an important resource for policy makers scholars students and practitioners actively working in this increasingly dynamic area of law
