

Problem Statement

1 Introduction

There will always be a need for maintenance on mechanical systems and components because of friction and wear. It is however not always as simplistic as "if it breaks, repair it" and in recent years the need for scientific maintenance has increased tremendously. Reasons for this could be the increased sophistication of production equipment, the need for a high return on an investment and the high cost of maintenance.

The objective of an organization's maintenance activities should be to support the production process with maximal levels of availability, reliability, operability and safety at acceptable cost. If this objective is pursued the results will be clearly evident in the form of increased production capacity and thus company profit. As high profit is the reason for the existence of production concerns, maintenance should be regarded in a very serious way.

Various maintenance models exist to act as guidelines for an effective maintenance function. One such model called 'The Maintenance Cycle' is proposed by Coetsee[22] and act as a good overview of the total complicated maintenance function. See Figure 1.1, on the next page.

The maintenance cycle is divided into two orbits namely: (1) The outer cycle which represents the managerial processes in the maintenance organization; and (2) The inner cycle which involves the operational and technical processes. In this dissertation we will focus on maintenance strategy setting, one of the components in the inner cycle.

RESEARCH PROPOSAL: CRAFTING WITH AI AWARENESS Samad Sepasgozar, 2024-09-09 Academic proposals have clear communication and standardized formatting in most fields while creative presentations might be acceptable in design or artistic fields. Imagine your research proposal including a novel concept buried under flashy fonts, diverse colors, and confusing graphics, resulting in losing the key message in a visual cacophony. This chapter guides you through crafting a proposal with clear information that resonates with scientific norms, ensuring clarity and coherence from the cover to the conclusion. We'll explore font choices, graphic elements, and formatting with a clear structure to elevate your message without distracting from its core excellence. A plain, well-structured research proposal should highlight the research rigor, not the visual effects.

David Garson, 2001-11-21 Describes the quantitative research process, framing analytical questions, developing a comprehensive outline, providing a roadmap for the reader, and accessing indispensable computer and program tools. Supplies end-of-chapter checklists, extensive examples, and bibliographies.

How to Write a Research Paper: A Guide Book for Neophyte Students Dr. Rashmee Yadav, 2023-02-14 ABOUT THE BOOK The book *How to Write a Research Paper* Guide book for neophyte students, composed by three youngsters Dr. Rashmee Yadav, Dr. Brij Vikash Singh, and Dr. Mithesh Verma, is a fantastic effort in this direction. They have covered almost all the areas of research paper writing process and how to write a research paper, etc. The book is based on the research paper writing process. The author's main focus on this book is *How to Write a Research Paper Guide Book for the Neophyte Students*. This book is helpful to students writing research paper in proper way because plenty of research papers are written every year. But in many of them, research methodology aspect is not given a considerable attention, and because of which the research papers end up in just being endless words containing stories leading to less or no sense. It should be noted that the quality in research articles comes from the extensive planning and in-depth research before starting writing them. This is true even for management research papers. Writing a research paper analyzes a perspective or argues a point. Regardless of the type of research paper the researcher is writing, the researcher should present his own thinking backed up by others' ideas and information. Research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences. We have developed a detailed approach to writing research papers, and the approach is presented here. Instead of focusing on one research paper, we have focused on the process of research writing through a series of shorter writing exercises. Students begin by having to carefully think about a topic of research and by developing a working idea. They then write a series of shorter essays that explore that topic. All along the way, students are continuing to research and revise their working proposal so that by the end of the term, their thinking about their original topic of research has evolved. This book is a *Guide to College Success for Post-traditional Students* Henry S. Merrill, 2018-08-01

The purpose of this book is to assist post-traditional students to achieve success in the Occupational Workforce and

Leadership Studies OWLS Department and develop their individualized pathway to earn the interdisciplinary Bachelor of Applied Arts and Sciences BAAS degree at Texas State University Applied baccalaureate degrees incorporate higher order thinking skills and advanced technical knowledge and skills with applied coursework BAAS students may also earn college level credits through prior learning assessment PLA evaluating and credentialing knowledge and skills gained outside the classroom The organization and content of this book provides adult degree program faculty and leaders an example of how one required textbook develops and supports the outcomes and activities in all the core courses of an interdisciplinary degree program designed for post traditional adult learners The majority of the students earning the BAAS degree are post traditional students They are often defined with some or all of these characteristics over age 25 years old when starting or returning to college may not have a traditional high school diploma enroll part time work full time are financially independent have dependents other than a spouse and may be a single parent These students juggle multiple roles and responsibilities in the family workplace and community Post traditional students bring rich work life experiences may be experiencing personal and or professional transitions have clear career goals and often finance their education They seek flexible programs including online education PLA and accelerated course formats Thus post traditional students want active collaborative and interactive learning relevant to career and other roles and goals

The Elements of Inquiry Peter J. Burke, Sara Jimenez Soffa, 2018-03-23 The Elements of Inquiry covers the basic guidelines for graduate students doing an investigation or inquiry project It distills the rubrics necessary for teaching research methods and completing research projects and gives the student researcher a list of steps to follow to complete any type of inquiry project including formal research projects such as doctoral dissertations It was written to support the work of students in an educational leadership doctoral program but it will also assist the research efforts of college students at any level in any discipline The book begins by establishing the underlying philosophical concepts upon which all good research is based preparing students to get down to the nuts and bolts of conducting their own research and evaluating the research of others Fundamental concepts and rules of research are explained both for producers and consumers of social science and educational research Numerous practical examples illustrate the steps in the research process presented in the text There are end of chapter exercises for students to apply the concepts discussed in the chapter Templates for organizing and presenting research provide students with a game plan for success with their research The book ends with an up to date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more specialized research topics While most research books detail one or more method in depth this text provides a broad introduction to many techniques and models used in doctoral dissertations and will be of particular value to those who are consumers of inquiry studies and research reports Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research
