The Students and Their Books Danilo Facca,2025-02-17 The topic of this volume is the teaching and learning practices in the major and minor academic centers of renaissance Europe and their relevance for early modern intellectual history Academic knowledge is here regarded not as a finished product but as a process induced by multiple factors and several conditions the personalities and intellectual profiles of teachers and learners the dialectic between their respective interests and roles the institutional context from the immediate one given by the particular school or university with their courses and curricula to the more remote one given by governing political power or surveilling religious authority or the interplay between the two Last but not least one should consider the several impulses of an epoch that seem to impart to the historical course a sudden acceleration inducing decisive sometimes disruptive changes to intellectual development the spread of humanistic culture the religious reformation and its consequences the encounter with new epistemologies the access to education of new social subjects and behind all these and as their common catalyst the progressive establishment of the press as a means of learning consolidation and dissemination **The Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1894 **Textbooks in Academic Libraries** Chris Diaz,2017-09-15 A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks and this book spotlights a variety of examples that can be used as models A Text-book of Practical Therapeutics Hobart Amory Hare,1891

Publishers' Circular and General Record of British and Foreign Literature, and Booksellers' Record ,1895 **Book Review Digest** ,1912 *Capturing Finance* Carolyn Hardin,2021-07-09 Arbitrage the trading practice that involves buying assets in one market at a cheap price and immediately selling them in another market for a profit is fundamental to the practice of financial trading and economic understandings of how financial markets function Because traders complete transactions quickly and use other people s money arbitrage is considered to be riskless Yet despite the rhetoric of riskless trading the arbitrage in mortgage backed securities led to the 2008 financial crisis In *Capturing Finance* Carolyn Hardin offers a new way of understanding arbitrage as a means for capturing value in financial capitalism She shows how arbitrage relies on a system of abstract domination built around risk The commonsense beliefs that taking on debt is necessary for affording everyday life and that investing is necessary to secure retirement income compel individuals to assume risk while

financial institutions amass profits Hardin insists that mitigating financial capitalism's worst consequences such as perpetuating class and racial inequities requires challenging the narratives that naturalize risk as a necessary element of financial capitalism as well as social life writ large **The Minnesota Law Journal** ,1896 The Medical Bulletin ,1891
