What Is Not God? Jacob Pannirselvam, 2014-11-04 In this book The procedural possibilities of the following philosophies are analyzed in the light of scientific principles When consciousness gives rise to energy and matter creation starts Thought is the creative power heaven or hell it is created by thought Where the Self is there happened the Big Bang Propagation in all lives including man takes place when the individual life experiences its original state of being i e body being transcended Mans life plan including hereditary and non hereditary behavior talents inefficiency and conditions of life is stuffed in his genome Man can change the gene set up in his body by meditation on the Self **A Scientific Inquiry Into the Nature of God, the Spiritual, and Near Death Experiences** Stephen Blaha, 2002-06 Who is God What is His nature Is there a scientific approach to understanding God Can we apply modern scientific thinking to God in the same way that theologians apply classical reasoning to God Are there spiritual phenomena Can we rationally analyze them How do we interpret the apparently spiritual nature of Near Death Experiences Can we explain how a blind person undergoing a Near Death Experience sees the operating table with his/her mind and can describe the people there afterwards All of these questions are addressed in a clear straightforward way in this well written book A profound book that will appeal to thoughtful readers

Against the Spiritual Turn Sean Creaven, 2014-04-08 The argument presented in this book is that the recent spiritual trajectory of Roy Bhaskar's work upon which he first embarked with the publication of his From East to West undermines the fundamental achievements of his earlier work The problem with Bhaskar's new philosophical system Transcendental Dialectical Critical Realism or simply Meta Reality from the critical realist Marxist perspective endorsed here is that it marks both a departure from and a negation of the earlier concerns of Bhaskar to develop a realist philosophy of science and under labour for an emancipatory materialist socio historical science The end result is a meta philosophy which is irrealist speculative under theorized internally self contradictory and which cannot provide philosophical guidance to liberatory social practices In opposition to theist ontological logics more generally including the rather more rational theism presented by Margaret Archer Andrew Collier and Doug Porpora the argument of this book is that the earth bound materialist dialectics of the classical Marxist tradition and the naturalistic humanism these dialectics under labour on the terrain of socio historical being offer a much more promising way forward for critical realist theory and for liberatory politics and ethics **Research in the Social Scientific Study of Religion, Volume 21** Ralph L.
