spiritual to be pursued for the human soul Or to put it in a different way what exactly makes martial arts so amazing that somehow they will eventually lead the practitioners to the spiritual realm of self cultivation in its highest depth Contrary to the conventional wisdom about martial arts as held by many over the ages this popular view about martial arts has become so legendary that their dark sides have yet to be systematically explored and that the lofty aims of martial arts are neither possible nor desirable to the extent that their proponents would like us to believe Of course this is not to say that the very tradition of martial arts is absolutely useless or that the literature on martial arts hitherto existing in history is spiritually unworthy to be appreciated Instead this book constructively offers an alternative better way to understand the nature of martial arts in special relation to the body and spirit of warriors while learning from different views in the literature without favoring any one of them nor integrating them as they are not necessarily compatible with each other and in the end transcending them towards a new horizon not conceived before This seminal view if proven valid will fundamentally change the legendary way that people have thought about martial arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate
