

Active vs. Passive

Active Euthanasia

- Patient or someone else can perform or assist
- Not currently legal (except in Oregon and outside the U.S.)
- Seen by some as a morally problematic form of killing

Passive Euthanasia

- Something needed for continued patient survival is intentionally withheld, which facilitates the patient's death via "natural" causes
- Can include non-treatment or withdrawal of nourishment or hydration
- Usually instigated by medical staff
- Currently legal and regarded as acceptable within medicine
- Seen as a less morally problematic omission

The Methods of Bioethics John McMillan, 2018-11-30 This is the first book in bioethics that explains how it is that you actually go about doing good bioethics Bioethics has made a mistake about its methods and this has led not only to too much theorizing but also fragmentation within bioethics The unhelpful disputes between those who think bioethics needs to be more philosophical more sociological more clinical or more empirical continue While each of these claims will have some point they obscure what should be common to all instances of bioethics Moreover they provide another phantom that can lead newcomers to bioethics down blind alleyways stalked by bristling sociologists and philosophers The method common to all bioethics is bringing moral reason to bear upon ethical issues and it is more accurate and productive to clarify what this involves than to stake out a methodological patch that shows why one discipline is the most important This book develops an account of the nature of bioethics and then explains how a number of methodological spectres have obstructed bioethics becoming what it should In the final part it explains how moral reason can be brought to bear upon practical issues via an empirical Socratic approach

The Life and Death Debate Norman L. Geisler, J Moreland, 1990-11-09 This work is an introductory treatment of issues and options in social and bioethics which center on the end of life Moreland and Geisler have attempted to simplify and summarize various end of life topics without being simplistic or caricaturing different viewpoints even though the authors own viewpoints are made perfectly clear A comprehensive bibliography glossary and subject and author index make this a valuable textbook as well as a resource for further study The major purpose of this book is to make the reader think more clearly and deeply about the important issues discussed between its covers Beginning the work is an essay that introduces the dilemma of ethical decisions The following chapters separately discuss the situations of abortion infanticide euthanasia suicide capital punishment and war The discussion concludes with a chapter of practical and theoretical guidance for making ethical decisions A glossary subject index author index and selected bibliography for each chapter make this a valuable text This important work will not only appeal to experienced philosophers but also to students

Moore, 2009-01-22 The concept of causation is fundamental to ascribing moral and legal responsibility for events Yet the relationship between causation and responsibility remains unclear What precisely is the connection between the concept of causation used in attributing responsibility and the accounts of causal relations offered in the philosophy of science and metaphysics How much of what we call causal responsibility is in truth defined by non causal factors This book argues that much of the legal doctrine on these questions is confused and incoherent and offers the first comprehensive attempt since Hart and Honor to clarify the philosophical background to the legal and moral debates The book first sets out the place of causation in criminal and tort law and outlines the metaphysics presupposed by the legal doctrine It then analyses the best theoretical accounts of causation in the philosophy of science and metaphysics and using these accounts criticises many of the core legal concepts surrounding causation such as intervening causation foreseeability of harm and complicity It considers and rejects the radical
