Millennial Culture and Communication Pedagogies Andrew Sutherland,Michael G. Strawser,2018-11-15 This book examines the ways in which faculty and staff at the higher education level teach and communicate with their millennial students and colleagues The contributors address how millennials academic and non academic interests and everyday

performances within and outside of higher education influence how faculty and staff communicate with them This book delves into how millennials can become more adaptable in their communication with others in society especially in higher education be it from different generations or cultures that may or may not communicate the way they do The contributors argue that millennial culture should be carefully studied by instructors researchers and administrators to create a better classroom and educational experience and also improve the level of communication among these constituencies *If Einstein Ran the Schools* Thomas Armstrong Ph.D.,2019-10-11 Many world class thinkers and creators have been concerned about the state of education in the United States Discover their thoughts on how children really learn and what teachers must do to optimally tap children s latent abilities During the last three decades education reformers have pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency in basic skills However during this period that author Thomas Armstrong calls the miseducation of America a number of troubling trends have surfaced including a decrease in creative thinking scores among children in kindergarten through third grade Rather than focus on what s wrong with the education system that has produced these outcomes Armstrong lays out what creative thinkers know about how children should be educated In an extended thought experiment he asks what would happen if we turned the reins of educational policy over not to the politicians and educational bureaucrats but to eminent thinkers and creators like Albert Einstein Pablo Picasso Martin Luther King Jr Rachel Carson Doris Lessing Jane Goodall and other seminal culture builders What might they say about the best way to educate a child If Einstein Ran the Schools suggests that the answers to this intriguing question should guide efforts to reform our nation s schools

damaging gender norms of our society In *Rage Becomes Her* Soraya Chemaly argues that our anger is not only justified it is also an active part of the solution We are so often encouraged to resist our rage or punished for justifiably expressing it yet how many remarkable achievements would never have gotten off the ground without the kernel of anger that fueled them Approached with conscious intention anger is a vital instrument a radar for injustice and a catalyst for change On the flip side the societal and cultural belittlement of our anger is a cunning way of limiting and controlling our power one we can no longer abide A work of great spirit and verve *Time Rage Becomes Her* is a validating energizing read that will change the way you interact with the world around you
