The Hollywood Renaissance Yannis Tzioumakis,Peter Krämer,2018-06-28 In December 1967 Time magazine put Bonnie and Clyde on its cover and proudly declared that Hollywood cinema was undergoing a renaissance For the next few years a wide range of formally and thematically challenging films were produced at the very centre of the American film industry often but by no means always combining success at the box office with huge critical acclaim both then and later This collection brings together acknowledged experts on American cinema to examine thirteen key films from the years 1966 to 1974 starting with Who s Afraid of Virginia Woolf a major studio release which was in effect exempted from Hollywood s Production Code and thus helped to liberate American filmmaking from self censorship Long standing taboos to do with sex violence race relations drugs politics religion and much else could now be broken often in conjunction with extensive stylistic experimentation Whereas most previous scholarship has examined these developments through the prism of auteurism with its tight focus on film directors and their oeuvres the contributors to this collection also carefully examine production histories and processes In doing so they pay particular attention to the economic underpinnings and collaborative nature of filmmaking the influence of European art cinema as well as of exploitation experimental and underground films and the connections between cinema and other media notably publishing music and theatre Several chapters show how the innovations of the Hollywood

Renaissance relate to further changes in American cinema from the mid 1970s onwards *The Jaws Book* I.Q. Editing and Special/Visual Effects Charlie Keil, Kristen Whissel, 2016-08-26 Most moviegoers think of editing and special effects as distinct components of the filmmaking process We might even conceive of them as polar opposites since effective film editing is often subtle and almost invisible whereas special effects frequently call attention to themselves Yet film editors and visual effects artists have worked hand in hand from the dawn of cinema to the present day Editing and Special Visual Effects brings together a diverse range of film scholars who trace how the arts of editing and effects have evolved in tandem Collectively the contributors demonstrate how these two crafts have been integral to cinematic history starting with the trick films of the early silent era which astounded audiences by splicing in or editing out key frames all the way up to cutting edge effects technologies and concealed edits used to create the illusions Throughout readers learn about a variety of filmmaking techniques from classic Hollywood's rear projection and matte shots to the fast cuts and wall to wall CGI of the contemporary blockbuster In addition to providing a rich historical overview Editing and Special Visual Effects supplies multiple perspectives on these twinned crafts introducing readers to the analog and digital tools used in each craft showing the impact of changes in the film industry and giving the reader a new appreciation for the processes of artistic collaboration they involve
