**Teaching for Flow: Transforming Primary Education for Optimal Learning** Rebecca Meager,2025-12-01 Flow in positive psychology describes a mental state of being fully immersed and energised in the successful performance of a task Teaching for Flow explores a radical transformation of the primary curriculum with a look at adopting a thematic investigatory approach based on the children s interests exploring ways to foster the right

conditions for children to enter into the optimal state for learning known as flow or more colloquially as being in the zone. Practical activities and classroom resources encourage deeper engagement and motivation among all students regardless of their backgrounds or neurodiversity whilst simultaneously cultivating a love for learning, critical thinking and creativity. Informed by neuroscience, areas covered include learning and development, teaching for flow, special educational needs, SEND, outdoor learning and Forest School, homework and integrating flow into the curriculum. The book suggests a complete overhaul of the current curriculum to place emphasis on a more child-centred and engaging learning experience. Focusing on curriculum design and lesson planning and assessment, the author demonstrates how this inclusive approach can be applied practically and how teachers can have autonomy over curriculum content driven by the interests of their pupils. *Teaching for Flow* is an essential resource for any classroom teacher or school leader looking to develop a more active, investigatory and child-centred approach to learning in their school that allows children to grow and flourish. Getting Beyond "Interesting"

Olga M. Nesi, 2012-07-19. Make use of a detailed plan and ready-to-use lessons for teaching appeal terms and Book Hook writing to students. *Getting Beyond Interesting: Teaching Students the Vocabulary of Appeal to Discuss Their Reading* is a practical application book that gives librarians all the tools they need to implement the teaching of both appeal terms and Book Hook writing and sharing. When students know how to write Book Hooks and have access to an easy-to-use system for allowing students to share Book Hooks, the result is greatly increased reading through the power of peer recommendations. This book not only supplies a detailed plan for teaching appeal terms and Book Hook writing but it also provides two extensive appendices containing all the black line masters and forms needed to implement these lessons. As a result, practitioners will be able to enhance their students' reading culture through increased sharing of reading and most importantly by empowering students with the ability to clearly define their reading preferences. *Representations of Technology in Science Fiction for Young People*

Noga Applebaum, 2009-09-10. In this new book, Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present, exposing the anti-technological bias existing within a genre often associated with the celebration of technology. Applebaum argues that perceptions of technology as a corrupting force, particularly in relation to its use by young people, are a manifestation of the enduring allure of the myth of childhood innocence and result in young adult fiction that endorses a technophobic agenda. This agenda is a form of resistance to the changing face of childhood and technology's contribution to this change. Further, Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children's complex yet pleasurable interactions with technology today. The study looks at works by well-known authors including M.T. Anderson, Monica Hughes, Lois Lowry, Garth Nix, and Philip Reeve and explores topics such as ecology, cloning, the impact of technology on narrative structure, and the adult-child hierarchy. While focusing on the popular genre of science fiction as a useful case study, Applebaum demonstrates that negative attitudes

toward technology exist within children's literature in general making the book of considerable interest to scholars of both science fiction and children's literature      Life and Loss Linda Goldman,2021-08-04 For decades *Life and Loss* has been the book clinicians have relied on for a full and nuanced presentation of the many issues with which grieving children grapple as well as an honest exploration of the interrelationship between unresolved grief educational success and responsible citizenry This classic edition which includes a new preface from the author brings this exploration firmly into the twenty first century and makes a convincing case that children's grief is no longer restricted only to loss identified children Children's grief is now endemic it is global *Life and Loss* is not just the book mental health professionals need to understand grief in the twenty first century it's the book they need to work with grief in a practical and constructive way      *Suzanne Collins* Nick Hunter,2014-01-30 What makes *Suzanne Collins* extraordinary Read this book to find out This title explores her childhood in Belgium and the USA including her father's strong influence on her writing We look at her road to professional accomplishments including her time as a writer for television and her success with *The Hunger Games* trilogy Read about others perspectives on her life how her life has been different to women writers of the past and how she has broken boundaries      Climate Change and Youth Linda Goldman,2022-05-10 *Climate Change and Youth* is a pioneering book that opens the door to understanding the profound impact climate change has on the mental health of today's young people Chapters provide age appropriate language for a meaningful dialogue and resources for acknowledging children's voices separating fact from fiction about environmental issues encouraging participation in activism creating tools to reduce stress and highlighting inspirational role models and organizations for action The book includes firsthand examples research children's work interviews and terminology It also shares age appropriate resources and websites relating to climate change and challenges Filling a large void in the literature on this topic this essential resource offers techniques and tools that professionals and caring adults can use to address the stresses associated with climate change and offer strategies for hope resilience and action      A to Zoo Rebecca L.
