Cognitive Linguistics and Translation Ana Rojo, Iraide Ibarretxe-Antuñano, 2013-07-15 The papers compiled in the present volume aim at investigating the many fruitful manners in which cognitive linguistics can expand further on cognitive translation studies Some papers e.g. Halverson Mu oz Mart n Mart n de Le n take a theoretical stand since the epistemological and ontological bases of both areas cognitive linguistics and

translation studies should be known before specific contributions of cognitive linguistic to translation are tackled Several works in the volume attempt to illustrate how some of the notions imported from cognitive linguistics may contribute to enrich our understanding of the translation process in a general translation problem such as metaphor e g Samaniego the relationship between form and meaning e g Tabakowska Rojo and Valenzuela or cultural aspects e g Bern rdez Sharifian Jamarani Others use translation as an empirical field to test some of the basic assumptions of cognitive linguistics such as frames e g Boas metonymy e g Brdar Brdar Szab and lexicalisation patterns e g Ibarretxe Antu ano Filipovi Finally another set of papers e g Feist Hatzidaki opens up new lines of investigation for experimental research a very promising area still underdeveloped

Cognitive Foundations of Linguistic Usage Patterns Hans-Jörg Schmid, Susanne Handl, 2010-03-26 The volume presents an up to date collection of methodologically sensitive contributions providing mainly enthusiastic at times also critical support for the cognitive linguistic enterprise The book is important for the advancement of cognitive linguistics because the contributions demonstrate the seriousness of its ambitions to develop into a set of testable linguistic approaches For the same reason the volume is a contribution to our understanding of language in general since it puts a promising modern approach on firmer ground Assets of the book include the wide range of linguistic phenomena studied individual concepts fundamental semantic problems like vagueness and polysemy grammatical issues incl gender and tense collocations constructions and speech acts and the scope of applied perspectives including lexicographical computational developmental and critical discourse ones The languages investigated are English German Dutch Polish and Italian Common to the contributions is the desire to bring together observed patterns of linguistic usage with concepts and models established in cognitive linguistics In addition all contributions have an empirical basis and emphasize the need to rely on a sound methodology The linguistic phenomena investigated span the range from the lexico conceptual and collocational level to constructions grammatical categories and functions Two complementary perspectives of language and cognition are represented in the volume In one group the established methods of psycholinguistic experimentation quantitative corpus analysis and computational simulation are exploited to demonstrate the viability and to increase the plausibility of cognitive linguistic thinking The second group tests well known cognitive linguistic approaches like Conceptual Metaphor Theory the Theory of Idealized Cognitive Models and Construction Grammar against authentic data demonstrating their applicability and explanatory potential Both groups include contributions reaching beyond the scope of traditional cognitive linguistic topics e g by taking a critical stance of reductionist cognitive thinking The volume is of interest to cognitive linguists psycholinguists theoretical linguists lexicologists and lexicographers
