Gallagher, 2013-10-22 A long history of inquiry about human nature and the self stretches from the ancient tradition of Socratic self knowledge in the context of ethical life to contemporary discussions of brain function in cognitive science It begins with a conflict among the ancients On one view which comes to be represented most clearly by Aristotle the issue is settled in terms of a composite and very complex human nature Who I am is closely tied to my embodied existence The other view found as early as the Pythagoreans and developed in the writings of Plato Augustine and Descartes held that genuine humanness is not the result of an integration of lower functions but a purification of those functions in favour of a liberating spirituality The animal elements are excluded from the human essence The modern debate on the problem of the self although owing much to the insights of Locke and Hume can still be situated within the context of the two schools of ancient thought and this has led many to despair over the lack of apparent progress in this problem Today of course we often tend to look to science rather than philosophy to develop our understanding of a wide range of fundamental issues To what extent is the problem of the self a scientific issue Can insights from the study of neuropsychology and cognitive development in infancy provide a new perspective Can the study of schizophrenia and dissociative identity disorders tell us anything about the nature of human self consciousness Many would answer yes to the above questions but then is it not also the case that the study of exceptional self actualised human experience is equally relevant And can the phenomenological tradition dedicated to the systematic study of human experience and contemporary analytic approaches in philosophy help us out of some of the impasses that have bedevilled the empiricist tradition **MODELS OF THE SELF** includes all these perspectives in an attempt to cast light on one of the most intractable problems in science and the humanities **Self-Help That Works**

Summary of James Fadiman & Jordan Gruber's *Your Symphony of Selves* Everest Media, 2022-05-23T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 All humans are composed of more than one self When things are going well each plays its rightful role as part of a harmonious symphony But when things aren't going so well we are often forced to recognize and deal with our different selves 2 The Single Self Assumption is the belief that we are a single unified entity It is the belief that we are a collection of healthy harmonious selves However this way of thinking is so prevalent that it seems like a barrier or veil prevents us from directly experiencing or considering the idea that we are a collection of healthy selves 3 The Single Self Assumption is the belief that we have only one self The new assumption is that it is normal to have more than one self and that optimal functioning and well being necessitates acknowledging and working with all of our selves 4 Bowie was extremely shy but he was able to get onstage if he had a new identity He adopted personas in his musical career and his legacy is the idea that we have many different selves and if we can only dare to confront them we can choose who is to host our life at any one moment

Creativity and the Poetic Mind Jean Tobin, 2004 Creativity and the Poetic Mind mingles the voices of well known writers such as Nikki Giovanni Donald Hall John Koethe Marge Piercy and Robert Pinsky with newer voices and includes engaging excerpts from interviews with thirty eight American poets Within a sustained argument about creative states of mind this book innovatively presents and explores the technique of going to the place as more reliable in writing poetry than waiting for inspiration It explains why poets frequently believe that talking about their own poetry may damage their creativity and why for centuries inspiration has seemed to come from somewhere beyond the poet In addition it discusses the practicality of poets thinking that being creative and writing poetry are two separate skills inspiration is unreliable but experienced poets create daily
