

Effectiveness of Journal Writing in Supporting Skills in Writing English Essay

Bambang Yudi Cahyono

Abstract: This research was aimed at knowing the effectiveness of providing journal writing in supporting the students' skills in writing English essay. The subjects were English department students who took Writing III course in the academic year of 1995/1996. This study involved two intact groups of students. The experimental group was given weekly journal writing, while the control group followed the regular writing. At the end of the treatment, writing tests on free topics were assigned and the students' works were scored using ESL Composition Profile. The result of analysis using t-test indicated that journal writing scores of the students from the two groups were not significantly different. However, students' responses indicated positive evaluation on the application of journal writing.

Key words: writing skills, journal writing.

It has been widely believed that writing, among the four language skills, is the most difficult skill. This is because it involves several components which have to be considered while a learner is writing, for example contents, rhetorics, vocabularies, grammatical structures, and writing mechanics such as punctuation and capitalization (Hartfiel, *et al.*, 1985:102). As a complex skill which is not easy to teach, it has stimulated

What Is A Journal Essay:

Miscellaneous: Covent-Garden journal. Essay on nothing. Charge delivered to the Grand jury, 29th June, 1749. Journal of a voyage to Lisbon. Fragment of a comment on Lord Bolingbroke's Essays. An enquiry into the causes of the late increase of robbers Henry Fielding, Arthur Murphy, 1806 *Journal Article Writing and Publication* Sharon A. Gutman, 2024-06-01 The ability to demonstrate that a specific health care profession provides valuable and effective services that meet society's health needs is a major objective for all health care academicians and researchers. Such skills are critical to ensure service reimbursement from an increasingly small pool of health care dollars. Demonstrating clinical effectiveness depends on the reporting of written research results through journal publication so that the health care community and larger society will be able to access and read evidence supporting health care services. Today several clinical reporting standard guidelines have been created by researchers to enhance the ability of readers to evaluate the quality and value of studies. *Journal Article Writing and Publication* is the first text to compile those clinical research reporting standards in one source and helps educators and novice researchers to better understand the skills needed for journal publication. Health care researchers must begin using these reporting standards in order to write manuscripts that are both correctly formatted and transparently convey all critical study strengths and limitations. Educators must teach these reporting standards to students who must evaluate research reports as consumers and possible future contributors to the literature through their own writing. *Journal Article Writing and Publication* by Dr Sharon A Gutman, a former editor of the *American Journal of Occupational Therapy*, provides specific guidelines based on the most commonly accepted reporting standards for the preparation and writing of general research studies, intervention effectiveness studies, instrument development and testing studies, and case reports. A section is devoted to helping authors understand the rules governing the reporting of statistical data in text and tables. Separate sections help authors understand the manuscript preparation and submission process, the revision process, and the etiquette guiding communication with editors and reviewers. Guidelines for the preparation of scholarly discussion papers and editorials are also provided. *Journal Article Writing and Publication* also features a section that aims to help doctoral students and newly minted faculty turn academic work and dissertations into publishable journal articles. Suggestions are provided to help clinicians turn clinical data into research databases that could serve as the foundation for pilot studies. Finally, information is provided to help authors better understand the ethical considerations of publication, including plagiarism, dual submissions, inappropriate authorship, copyright, and conflict of interest. **Writing Your Journal Article in Twelve Weeks** Wendy Laura Belcher, 2009-01-20 A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company. Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day*. Humorous, direct, authentic, a seamless weave of experience, anecdote, and research. Kathleen McHugh, professor and director of the UCLA Center for the Study of Women.

Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles. *Sterne's 'Journal to Eliza'* Eva C. van Leewen, 1981
