Advances in Automation VI Andrey A. Radionov, Vadim R. Gasiyarov, 2025-02-01 This book reports on innovative research and developments in automation Spanning a wide range of disciplines including communication engineering control engineering predictive engineering and machine learning it focuses on methods and findings aimed at improving the control and monitoring of industrial and manufacturing processes as well as their reliability Based on the 7th International Russian Automation Conference RusAutoCon2024 held as a hybrid conference on September 8 14 2024 in from Sochi Russia this book provides academics and professionals with a timely overview of and extensive information on the state of the art in the field of automation and control systems It is also expected to foster new ideas and collaborations between groups in different countries

**Intelligent Data Mining and Analysis in Power and Energy Systems** Zita A. Vale, Tiago Pinto, Michael Negnevitsky, Ganesh Kumar Venayagamoorthy, 2022-12-13 Intelligent Data Mining and Analysis in Power and Energy Systems A hands on and current review of data mining and analysis and their applications to power and energy systems In Intelligent Data Mining and Analysis in Power and Energy Systems Models and Applications for Smarter Efficient Power Systems the editors assemble a team of distinguished engineers to deliver a practical and incisive review of cutting edge information on data mining and intelligent data analysis models as they relate to power and energy systems You ll find accessible descriptions of state of the art advances in intelligent data mining and analysis and see how they drive innovation and evolution in the development of new technologies The book combines perspectives from authors distributed around the world with expertise gained in academia and industry It facilitates review work and identification of critical points in the research and offers insightful commentary on likely future developments in the field It also provides A thorough introduction to data mining and analysis including the foundations of data preparation and a review of various analysis models and methods In depth explorations of clustering classification and forecasting Intensive discussions of machine learning applications in power and energy systems Perfect for power and energy systems designers planners operators and consultants Intelligent Data Mining and Analysis in Power and Energy Systems will also earn a place in the libraries of software developers researchers and students with an interest in data mining and analysis problems

*IoT Edge Solutions for Cognitive Buildings* Franco Cicirelli, Antonio Guerrieri, Andrea Vinci, Giandomenico Spezzano, 2022-12-10 This book outlines the promise of the field of the Cognitive Internet of Things when it is applied to cognitive buildings After an introduction the authors discuss the goals of cognitive buildings such as operation in a more efficient flexible interactive intuitive and sustainable way They go on to outline the benefits that these technologies promise to building owners occupants and their environments that range from reducing energy consumption and carbon footprint to promoting health well being and productivity The authors outline technologies that provide buildings and equipment with the ability to collect aggregate and analyze data and how this information can be collected by sensors and related to internal conditions and settings energy consumption user requests

and preferences to maintain comfort and save energy This book is of interest to practitioners researchers students and professors in IoT and smart cities      *Wind Forecasting in Railway Engineering* Hui Liu,2021-06-17 Wind Forecasting in Railway Engineering presents core and leading edge technologies in wind forecasting for railway engineering The title brings together wind speed forecasting and railway wind engineering offering solutions from both fields Key technologies are presented along with theories modeling steps and comparative analyses of forecasting technologies Each chapter presents case studies and applications including typical applications and key issues analysis of wind field characteristics optimization methods for the placement of a wind anemometer single point time series along railways deep learning algorithms on single point wind forecasting reinforcement learning algorithms ensemble single point wind forecasting methods spatial wind and data driven spatial temporal wind forecasting algorithms This important book offers practical solutions for railway safety by bringing together the latest technologies in wind speed forecasting and railway wind engineering into a single volume Presents the core technologies and most advanced developments in wind forecasting for railway engineering Gives case studies and experimental designs demonstrating real world applications Introduces cutting edge deep learning and reinforcement learning methods Combines the latest thinking from wind engineering and railway engineering Offers a complete solution to wind forecasting in railway engineering for the safety of running trains      **Reinforcement**

**Learning-Enabled Intelligent Energy Management for Hybrid Electric Vehicles** Teng Liu,2022-06-01 Powertrain electrification fuel decarburization and energy diversification are techniques that are spreading all over the world leading to cleaner and more efficient vehicles Hybrid electric vehicles HEVs are considered a promising technology today to address growing air pollution and energy deprivation To realize these gains and still maintain good performance it is critical for HEVs to have sophisticated energy management systems Supervised by such a system HEVs could operate in different modes such as full electric mode and power split mode Hence researching and constructing advanced energy management strategies EMSs is important for HEVs performance There are a few books about rule and optimization based approaches for formulating energy management systems Most of them concern traditional techniques and their efforts focus on searching for optimal control policies offline There is still much room to introduce learning enabled energy management systems founded in artificial intelligence and their real time evaluation and application In this book a series hybrid electric vehicle was considered as the powertrain model to describe and analyze a reinforcement learning RL enabled intelligent energy management system The proposed system can not only integrate predictive road information but also achieve online learning and updating Detailed powertrain modeling predictive algorithms and online updating technology are involved and evaluation and verification of the presented energy management system is conducted and executed      **Deep Reinforcement Learning-based Energy Management for Hybrid Electric Vehicles** Yeuching Li,Hongwen He,2022-02-14 The urgent need for vehicle electrification and improvement in fuel efficiency has gained increasing attention

worldwide Regarding this concern the solution of hybrid vehicle systems has proven its value from academic research and industry applications where energy management plays a key role in taking full advantage of hybrid electric vehicles HEVs There are many well established energy management approaches ranging from rules based strategies to optimization based methods that can provide diverse options to achieve higher fuel economy performance However the research scope for energy management is still expanding with the development of intelligent transportation systems and the improvement in onboard sensing and computing resources Owing to the boom in machine learning especially deep learning and deep reinforcement learning DRL research on learning based energy management strategies EMSs is gradually gaining more momentum They have shown great promise in not only being capable of dealing with big data but also in generalizing previously learned rules to new scenarios without complex manually tuning Focusing on learning based energy management with DRL as the core this book begins with an introduction to the background of DRL in HEV energy management The strengths and limitations of typical DRL based EMSs are identified according to the types of state space and action space in energy management Accordingly value based policy gradient based and hybrid action space oriented energy management methods via DRL are discussed respectively Finally a general online integration scheme for DRL based EMS is described to bridge the gap between strategy learning in the simulator and strategy deployment on the vehicle controller

*FDI Qualities Review of Jordan Strengthening Sustainable Investment* OECD,2022-06-22 Foreign Direct Investment FDI provides an important source of financing in Jordan but its reform momentum needs to be sustained and deepened so that the benefits of investment can be shared more widely across society This report examines how FDI can help Jordan meet Sustainable Development Goals in areas of productivity and innovation job quality and skills gender equality and decarbonisation

Designing with Alternative Building Materials and Review of Building Materials Kalyan Kumar Ganguly,2025-06-02 This book explores alternative building materials and their test results It includes a review of common building materials earth engineering and construction suitable soil types soil mechanics and production masonry construction rammed earth construction the use of ferro cement units in projects and the application of fibre reinforced concrete Other topics such as

project management computer aided design education and training for engineers construction work quality control safety aspects communication applications and case studies accompanied by construction photographs are covered in this book Features Focuses on alternative building materials and their applications in projects Provides a useful overview of earth and concrete alternative construction materials Comprehensively covers different types of fibre reinforced concrete Explains relevant sustainability and environmental benefits Includes a case study on carbon fibre composite material used for strengthening a column This book is aimed at professionals in civil and construction engineering

*The Habit Advantage: Simple Hacks to Boost Focus, Energy, and Productivity Every Day* Joshua Winters, 2025-09-03 What separates the average day from an extraordinary one The answer isn't luck it's habits The Habit Advantage is your essential guide to mastering small powerful routines that transform how you think work and live Built on timeless wisdom and modern productivity strategies this book reveals how to use the science of habit formation to unlock lasting energy sharper focus and unstoppable momentum Inside you'll discover practical no nonsense strategies you can use immediately Daily goals that keep distractions away and clarity front and center The worst first method to eliminate procrastination before it sabotages your day Peak time scheduling to harness your natural cycles for maximum output Mini milestones that help you push through big projects with ease The 30 day habit reset that rewires your routines faster than you thought possible Single task focus that kills stress and doubles efficiency Whether you want to supercharge your career streamline your personal life or simply feel more in control this book gives you the proven tools to turn habits into the ultimate productivity advantage Your future is built one habit at a time Start today

**Combining, Modelling and Analyzing Imprecision, Randomness and Dependence** Jonathan Ansari, Sebastian Fuchs, Wolfgang Trutschnig, María Asunción Lubiano, María Ángeles Gil, Przemyslaw Grzegorzewski, Olgierd Hryniewicz, 2024-08-09 This volume contains more than 65 peer reviewed papers corresponding to presentations at the 11th Conference on Soft Methods in Probability and Statistics SMPS held in Salzburg Austria in September 2024 It covers recent advances in the field of probability statistics and data science with a particular focus on dealing with dependence imprecision and incomplete information Reflecting the fact that data science continues to evolve this book serves as a bridge between different groups of experts including statisticians mathematicians computer scientists and engineers and encourages interdisciplinary research The selected contributions cover a wide range of topics such as imprecise probabilities random sets belief functions possibility theory and dependence modeling Readers will find discussions on clustering depth concepts dimensionality reduction and robustness reflecting the conference's commitment to addressing real world challenges through innovative methods

[Data-driven Analytics for Sustainable Buildings and Cities](#) Xingxing Zhang, 2021-09-11 This book explores the interdisciplinary and transdisciplinary fields of energy systems occupant behavior thermal comfort air quality and economic modelling across levels of building communities and cities through various data analytical approaches It highlights the complex interplay of heating cooling ventilation and power systems in different processes such as design

renovation and operation for buildings communities and cities Methods from classical statistics machine learning and artificial intelligence are applied into analyses for different building urban components and systems Knowledge from this book assists to accelerate sustainability of the society which would contribute to a prospective improvement through data analysis in the liveability of both built and urban environment This book targets a broad readership with specific experience and knowledge in data analysis energy system built environment and urban planning As such it appeals to researchers graduate students data scientists engineers consultants urban scientists investors and policymakers with interests in energy flexibility building city resilience and climate neutrality
