Overall, what success is to me

Success is about confidence and having a good standard and firm morals. In a 2022 study, it was found that those who are more successful tend to have these five things intelligence, social skills, work ethic and luck. They further explain all five saying: "People with high IQs are more likely to be successful because they have a natural ability to think critically and solve problems.", "People who are good at networking are more likely to be successful than those who aren't. Networking allows people to connect with potential business partners, friends and family members. This network of contacts can help people secure jobs, make new friends and find new opportunities.", "People who are hard working are more likely to be successful than those who aren't. Hard work means putting in effort no matter what the circumstances are.", and finally "No one is immune to luck, and some people are luckier than others. However, hard work and intelligence combined with good social skills and a work ethic can help you overcome any lack of luck."
