Simon, Edward L. Korn, Lisa M. McShane, Michael D. Radmacher, George W. Wright, Yingdong Zhao, 2006-05-09 DNA microarrays are an important technology for studying gene expression With a single hybridization the level of expression of thousands of genes or even an entire genome can be estimated for a sample of cells Consequently many laboratories are attempting to utilize DNA microarrays in their research Whereas laboratories are well prepared to address the significant experimental challenges in obtaining reproducible data from this RNA based assay investigators are less prepared to analyze the large volumes of data produced by DNA microarrays Although many software packages have been developed for the analysis of DNA microarray data software alone is insufficient One needs knowledge about the various aspects of data analysis in order to select and utilize software effectively There is a plethora of analysis methods being published and it is difficult for biologists to determine which methods are valid and appropriate for their problems Many scientists have learned that software is not an adequate substitute for biostatistical knowledge and seek statistical collaborators Unfortunately there is presently a shortage of statisticians who are available and knowledgeable about DNA microarrays For statisticians to be effective collaborators in any area they must invest the time to understand the subject matter area and become familiar with the literature so that they can ask the right questions and identify the key issues Our objectives in this book are twofold to provide scientists with information about the design and analysis of studies using DNA microarrays that will enable them to plan and analyze their own studies or to work with statistical collaborators effectively and to aid statistical and computational scientists wishing to develop expertise in this area **The Arithmetic Teacher**, 1992 *Audiovisual Materials*, 1982 **Audiovisual Materials** Library of Congress, 1982 *Adobe Illustrator 8* Ellen Behovian, Against The Clock Staff, 1999 For any course that includes graphic arts software and computer design software as part of the curriculum Courses can be found in Office Information Systems
