Whats On Life Science P1 November 2014:

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives ,

ECRM2015-Proceedings of the 14th European Conference on Research Methods 2015 Dr Vincent Cassar, Dr Frank Bezzina, 2015-06-01 Complete proceedings of the 14th European Conference on Research Methodology for Business and Management Studies Valletta Malta Published by Academic Conferences and Publishing International **Fluid Physiology** Thomas Woodcock, 2019-10-23 This book is essential reading for medical or veterinary practitioners who need to understand the new fluid physiology and to apply it to the safe care of patients The Starling principle is one of medicine s most important concepts and originates from Ernest Starling s laboratory research 120 years ago However inappropriate fluid therapy is now recognised as harming and even killing thousands of patients every year In 2004 a landmark study was published which confirmed the hypotheses put forward by Sheldon Weinbaum and Charles Michel among other physiologists that in most tissues and in most situations capillaries filter fluid to the interstitium but do not reabsorb it This book draws together for the first time the evolving science of the steady state Starling principle and the clinical evidence that reveals its applicability to safer patient care It is a thorough re appraisal of the basics of fluid therapy The mantra of colloid boluses for plasma volume resuscitation and colloid free isotonic salt solution for extracellular fluid volume does not explain observations from blinded

clinical trials and the expectation of benefit for resuscitation with colloids particularly in respect of oedema has not materialised Now that there is consensus that colloid volume therapy should not be used in critically ill patients there is a pressing need for a new paradigm for fluid therapy This book proposes an improved paradigm that takes into consideration the Starling principle which has been neglected by clinicians and revised by physiologists in recent years It retires the view of colloids as preferred plasma substitutes and focuses instead on the central volume of distribution of an infused fluid its rate of distribution to a peripheral volume and its rate of excretion In short it emphasises volume kinetics

How and Why Does Spatial-Hearing Ability Differ among Listeners? What Is the Role of Learning and Multisensory Interactions? Guillaume Andéol, Brian D. Simpson, Ewan A. Macpherson, 2016-08-29 Spatial hearing ability has been found to vary widely across listeners A survey of the existing auditory space perception literature suggests that three main types of factors may account for this variability physical factors e g acoustical characteristics related to sound localization cues perceptual factors e g sensory cognitive processing perceptual learning multisensory interactions and methodological factors e g differences in stimulus presentation methods across studies However the extent to which these and perhaps other still unidentified factors actually contribute to the observed variability in spatial hearing across individuals with normal hearing or within special populations e g hearing impaired listeners remains largely unknown Likewise the role of perceptual learning and multisensory interactions in the emergence of a multimodal but unified representation of auditory space is still an active topic of research A better characterization and understanding of the determinants of inter individual variability in spatial hearing and of its relationship with perceptual learning and multisensory interactions would have numerous benefits In particular it would enhance the design of rehabilitative devices and of human machine interfaces involving auditory or multimodal space perception such as virtual auditory multimodal displays in aeronautics or navigational aids for the visually impaired For this Research Topic we have considered manuscripts that present new methods or review existing methods for the study of inter individual differences present new data or review existing data concerning acoustical features relevant for explaining inter individual differences in sound localization performance present new or review existing psychophysical or neurophysiological findings concerning spatial hearing and or auditory perceptual learning and or multisensory interactions in humans normal or impaired young or older listeners or other species discuss the influence of inter individual differences on the design and use of assistive listening devices rehabilitation or human machine interfaces involving spatial hearing or multimodal perception of space ergonomics

From Chromosomes to Mobile Genetic Elements Lee B. Kass, 2024-06-27 This biography of Nobel Laureate Barbara McClintock 1902 1992 places her life and work in its social scientific and personal context The author examines the development of Barbara McClintock s scientific work and her influence upon individuals and upon the fields of cytogenetics and evolutionary biology in the period from 1902 to the present The history documents years of McClintock s notable and lauded scientific work long before she discovered and named transposable elements in the mid 1940s for which she ultimately received the Nobel Prize The biography employs documented evidence to expose demystify and provide clarity for legends and misinterpretations of McClintock s life and work Key Features Exposes and demystifies myths and legends told about McClintock s time in Missouri Clarifies the changing language of genes and genetics Places in perspective the history of McClintock s research Documents McClintock s

Food for All in Africa Gordon Conway, Ousmane Badiane, Katrin Glatzel, 2019-11-15 Africa requires a new agricultural transformation that is appropriate for Africa that recognizes the continent's diverse environments and climates and that

takes into account its histories and cultures while benefiting rural smallholder farmers and their families In this boldly optimistic book Sir Gordon Conway Ousmane Badiane and Katrin Glatzel describe the key challenges faced by Africa s smallholder farmers and present the concepts and practices of Sustainable Intensification SI as opportunities to sustainably transform Africa s agriculture sector and the livelihoods of millions of smallholders The way forward they write will be an agriculture sector deeply rooted within SI producing more with less using fertilizers and pesticides more prudently adapting to climate change improving natural capital adopting new technologies and building resilience at every stage of the agriculture value chain Food for All in Africa envisions a virtuous circle generated through agricultural development rooted in SI that results in greater yields healthier diets improved livelihoods for farmers and sustainable economic opportunities for the rural poor that in turn generate further investment It describes the benefits of digital technologies for farmers and the challenges of transforming African agricultural policies and creating effective and inspiring leadership Food for All in Africa demonstrates why we should take on the challenge and provides ideas and methods through which it can be met

Recombinant protein expression in microbial systems Eduardo A. Ceccarelli, Germán L. Rosano, 2014-10-02 With the advent of recombinant DNA technology expressing heterologous proteins in microorganisms rapidly became the method of choice for their production at laboratory and industrial scale Bacteria yeasts and other hosts can be grown to high biomass levels efficiently and inexpensively Obtaining high yields of recombinant proteins from this material was only feasible thanks to constant research on microbial genetics and physiology that led to novel strains plasmids and cultivation strategies Despite the spectacular expansion of the field there is still much room for progress Improving the levels of expression and the solubility of a recombinant protein can be quite challenging Accumulation of the product in the cell can lead to stress responses which affect cell growth Buildup of insoluble and biologically inactive aggregates inclusion bodies lowers the yield of production This is particularly true for obtaining membrane proteins or high molecular weight and multi domain proteins Also obtaining eukaryotic proteins in a prokaryotic background for example plant or animal proteins in bacteria results in a product that lack post translational modifications often required for functionality Changing to a eukaryotic host yeasts or filamentous fungi may not be a proper solution since the pattern of sugar modifications is different than in higher eukaryotes Still many advances in the last couple of decades have provided to researchers a wide variety of strategies to maximize the production of their recombinant protein of choice Everything starts with the careful selection of the host Be it bacteria or yeast a broad list of strains is available for overcoming codon use bias incorrect disulfide bond formation protein toxicity and lack of post translational modifications Also a huge catalog of plasmids allows choosing for different fusion partners for improving solubility protein secretion chaperone co expression antibiotic resistance and promoter strength Next controlling culture conditions like temperature inducer and media composition can bolster recombinant protein production With this Research Topic we aim to provide an encyclopedic account of the existing approaches to the expression of recombinant

proteins in microorganisms highlight recent discoveries and analyze the future prospects of this exciting and ever growing field

Rethinking Democracy Promotion in International Relations Jessica Schmidt, 2015-08-20 This book traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies Democracy promotion is widely considered to constitute a hypocritical and failed grand international narrative of the 1990s and has allegedly been replaced by other more pressing and academically more captivating concerns such as conflict management statebuilding and climate change This book challenges this position and argues that the core notions of democracy promotion such as empowerment inclusion and responsiveness are a key concern of contemporary international policymakers Drawing on the work of Michel Foucault Hannah Arendt as well as John Dewey it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management statebuilding and climate change The central development the book observes is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and complex which accounts for democracy's current but neglected centrality This book will be of much interest to students of democracy intervention statebuilding global governance and IR in general
