Annual Competitiveness Analysis And Impact Of Exchange Rates On Foreign Direct Investment Inflows To Asean Economies Khee Giap Tan,Trieu Duong Luu Nguyen,Hui Yin Chuah,Duy Nguyen,2018-11-27 This book titled 2017 Annual Competitiveness Analysis and Impact of Exchange Rates on Foreign Direct Investment Inflows to ASEAN Economies recount the development experience of ASEAN over the past 50 years describe the long term mega trends which will shape ASEAN s

development trajectory and propose a development vision with actionable policy recommendations for ASEAN to become the fourth largest economy in the world by 2030. Into its fifth edition, the book updates the annual economic competitive analysis for ASEAN 10 conducted by the Asia Competitiveness Institute (ACI). It also introduces an innovation to the institute's methodological framework, which is the use of Shapley values to come up with objective weights for indicators sub-environments and environments in the competitiveness index. This methodological innovation not only adds an element of objectivity in terms of the assignment of weights but also validates the robustness of results obtained from the competitiveness studies over the past years. Recognising the importance of foreign direct investment (FDI) to growth and development in the region, the book also presents an empirical investigation of the drivers of FDI inflows with specific focus on the effects of exchange rate and its volatility. For a group of economies looking to leverage on FDI and trade to transform themselves into the fourth largest economy in the world, it is important for ASEAN to achieve high external competitiveness, especially in terms of the member states' real effective exchange rates (REER). These research findings make important academic and policy contributions by teasing out the relationship between REER levels, volatility, and FDI in the ASEAN context. Finally, the book collates speeches by academics and policy makers on issues of key interests to the future development of ASEAN. It contains the reflection on the ASEAN Charter by Professor Tommy Koh, Ambassador at Large at the Ministry of Foreign Affairs of Singapore. Moreover, the discussions on the One Belt One Road initiative and its implication for the region by Mr K Shanmugam, Minister for Home Affairs and Minister for Law of Singapore, and Professor Liew Mun Leong, Chairman of Surbana Jurong and Changi Airport Group, as well as Provost Chair and Professor of NUS, make this book a valuable compendium for policy makers, thinkers, and anyone who has an interest in Southeast Asia and the Asia Pacific.

Volume A contains plenary and review talks ranging from the mathematical foundations of classical and quantum gravitational theories, including recent developments in string theory, to precision tests of general relativity, including progress towards the detection of gravitational waves and from supernova cosmology to relativistic astrophysics, including topics such as gamma ray bursts, black hole physics both in our galaxy and in active galactic nuclei in other galaxies, and neutron star pulsar and white dwarf astrophysics. The remaining volumes include parallel sessions which touch on dark matter, neutrinos, X-ray sources, astrophysical black holes, neutron stars, white dwarfs, binary systems, radiative transfer, accretion disks, quasars, gamma ray bursts, supernovas, alternative gravitational theories.

Miller, Michael C. McKenna, 2016-01-29 International literacy assessments have provided ample data for ranking nations charting growth and casting blame Summarizing the findings of these assessments which afford a useful vantage from which to view world literacy as it evolves this book examines literate behavior worldwide in terms of both the ability of populations from a wide variety of nations to read and the practice of literate behavior in those nations Drawing on The World's Most Literate Nations author Jack Miller's internationally released study emerging trends in world literacy and their relationships to political economic and social factors are explored Literacy and in particular the practice of literate behaviors is used as a lens through which to view countries economic development gender equality resource utilization and ethnic discrimination Above all this book is about trajectories It begins with historical contexts described in terms of support for literate cultures Based on a variety of data sources these trends are traced to the present and then projected ahead The literate futures of nations are discussed and how these relate to their economic and sociocultural development This book is unique in providing a broader perspective on an intractable problem a vantage point that offers useful insights to inform policy and in bringing together an array of relevant data sources not typically associated with literacy status The effects of a CAADP-compliant budget on poverty and inequality in Ghana Younger, Stephen D., Benin, Samuel, 2017-09-15 Ghana has accepted the CAADP commitment to dedicate 10 percent of government spending to the agricultural sector In a 2014 paper Benin argues that Ghana falls short of that goal and in a 2016 paper Younger shows that despite the current fiscal crisis there is fiscal space to meet the commitment Benin estimates the rates of return to increased public expenditure on agriculture finding that they are quite high especially if the investments are made in the noncocoa sector This paper uses Benin's estimates to examine the poverty and inequality consequences of increasing public expenditure on agriculture Key conclusions are that public expenditure on agriculture is surprisingly progressive especially if spent in the grains subsector

This progressivity combined with the high rate of return means that public investment in agriculture may actually be more efficient at reducing poverty than LEAP Ghana's targeted conditional cash transfer program

Validity Gregory J. Cizek, 2020-02-25 Validity is a clear substantive introduction to the two most fundamental aspects of defensible testing practice: understanding test score meaning and justifying test score use. Driven by evidence-based and consensus-grounded measurement theory principles and terminology, this book addresses the most common questions of applied validation: the quality of test information and the usefulness of test results. Concise yet comprehensive, this volume's integrated framework is ideal for graduate courses on assessment testing, psychometrics, and research methods, as well as for credentialing organizations, licensure, and certification entities, education agencies, and test publishers

Only in New Orleans Luis Mirón, Brian R. Beabout, Joseph L. Boselovic, 2015-07-22 With 2015 marking the 10th commemoration of Hurricane Katrina, education reform in New Orleans continues to garner substantial local, national, and international attention. Advocates and critics alike have continued to cite test scores, new school providers, and different theories of governance in making multiple arguments for and against how contemporary education policy is shaping public education and its role in the rebuilding of the city. Rather than trying to provide a single unified account of education reform in New Orleans, the chapters in this volume provide multiple ways of approaching some of the most significant questions around school choice and educational equity that have arisen in the years since Katrina. This collection of research articles, essays, and journalistic accounts of education reform in New Orleans collectively argues that the extreme makeover of the city's public schools toward a new market-based model was shaped by many local, historically specific conditions. In consequence, while the city's schools have been both heralded as a model for other cities and derided as a lesson in the limits of market-based reform, the experience of education reform that has taken place in the city and its impacts on the lives of students, families, and educators could have happened only in New Orleans

From Evidence to Action Food and Agriculture Organization of the United Nations, 2018-10-18 Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades. However, the impacts of cash transfers programmes, especially in Sub-Saharan Africa, have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies: Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, South Africa, as well as a description of the innovative research methodologies, political economy issues, and good practices to design cash transfer programmes. The key objective of the book is to enhance the understanding of these development programmes, how they lead to a broad range of social and productive impacts, and also of the role of programme evaluation in the process of developing policies and implementing programmes

Assessing The E-Government Development Performance of Southeast Asian Countries (Based on the 2003- 2016 UN E-Government Survey) Chiara Anindya, Anang Dwi Santoso, Yusra

Purnamasari, Bimasakti Bhakti K., Ajeng Silvayanti, 2024-10-09 In the Information Age we live in governments around the world are provided with a variety of tools to aid their practices. Traditionally deemed as a bureaucratic practice, the incorporation of information and communications technologies (ICTs) allows governments to easily share public information. E-government allows citizens to claim an active role in the governing process. The practice of e-government is also seen to be more cost efficient as the government can reach its citizens in just a click. Naturally, e-government will continue to develop adjacent to the development of technology itself. In 2001, the United Nations (UN) started an exhaustive attempt to measure the global practice of e-government. The series of surveys began with an eighty-one page report titled *Benchmarking E-Government: A Global Perspective*. These surveys would later be known as the UN E-Government Survey. As stated in their 2003 publication, information technology applications, especially e-government programs, are increasingly becoming the cornerstone of government operations. p. 4 One of the primary outcomes of the first UN E-Government Survey was the E-Government Readiness Index, a treasured instrument the UN would later use in their subsequent research projects. Until December 2016, the UN has released nine survey reports on global e-government. The reports were published respectively in 2001, 2003, 2004, 2005, 2008, 2010, 2012, 2014, and 2016. However, the 2001 issue was not included as data for this monograph as it remains to only be an early effort in benchmarking the global progress of e-government. Each report addresses specific issues such as e-inclusion, sustainable development, connected governance, etc. The world rank of e-government practice, measured by the E-Government Development Index (EGDI), is included in each report. The EGDI was developed using the same components of the E-Government Readiness index but differs in the number of questions. Although the report doesn't address the thorough practice of e-government in all countries, it offers insight on the global, regional, and sub-regional digital government trends. Naturally, American and European countries appear frequently on the survey's top ranks. However, some Asian countries were starting to claim their place amongst the world's best e-government practices, with the Republic of Korea being the best worldwide in 2010, 2012, and 2014.

The Truth About the Tribulation James Lewis, 2020-10-28 Since I was in high school in the early sixties, I heard that the tribulation could come at any time. I was told nothing more needed to happen before the church was raptured. I was told there was no mention of Christians after the third chapter of Revelation. But I thought to myself, if nothing is left, why haven't we been raptured? About ten years ago, I started serious research on the subject. I found the answers were not as I was taught during my high school years. The more I studied, the more truth I found. I decided to put what I learned into a book to teach others the real truth about the tribulation. They say what you don't know can't hurt you. I found out that's a lie. There are things you need to know before the tribulation starts.
