Exploration did not cease after the circumnavigation of the globe; it continued to the present. Today, explorers are going in new directions, not just east and west, north and south. They explore backward in time and upward in space. Archaeology explores the shorter time scales and geochemistry the longer time scales of geological events: asteroidal and cometary collisions, magnetic reversals, continental formation, and more. However, on Earth we cannot go back indefinitely, for much of the evidence of the very earliest days has been lost.
