compelling vision of technology's potential to transform learning with an insightful analysis of the curricular challenges required for meaningful change and discusses the most recent trends in media and learning such as the potential of tablets and e reading

Holt McDougal Algebra 1, 2009-12-31 **Algebra 1: Explorations and Applications** Holt McDougal, 2001 *Improving Teacher Knowledge in K-12 Schooling* Xiaoxia A. Newton, 2018-03-15 This volume examines how several key components of the mathematics education system in the United States fail to provide teachers with adequate and effective tools to teach mathematics in K-12 classrooms. These components consist of teachers' own learning experiences as students in K-12 classrooms, their undergraduate or graduate trainings in mathematics, and their in-service professional development trainings. Newton argues that unless we improve these system components as a whole and recognize the importance of teaching future mathematics teachers explicitly and rigorously the topics they are expected to teach, teachers will continue to recycle a body of incoherent and incomprehensible mathematical knowledge to their students because these are the only types of mathematical knowledge they have at their disposal, both in terms of what they themselves have learned as K-12 students and in terms of the mathematical resources available to them, including the textbooks they rely on to teach as mathematics teachers.
