Advances in Network Technologies Anshul Verma, Pradeepika Verma, 2024-09-26 In the present technological age information is a valuable resource for both small and large enterprises as well as for our daily lives. The key enablers that link computer resources and devices together to gather, process and distribute crucial data both locally and worldwide are network technologies. For our daily lives and commercial operations, network technologies offer effective, adaptable and seamless communication while maximizing productivity and resources. Due to its significance, this field has undergone a significant evolution in the past few decades, moving away from traditional wired networks and toward Bluetooth, infrared, microwave, radio and satellite networks. These days, network technologies are not employed only in computer labs, businesses or homes; a wide range of domains such as vehicular ad hoc networks, mobile ad hoc networks and the Internet of Things have been seen using network technologies. Researchers from academia and industry have worked hard to build and develop software-based network technologies such as middleware, protocol stacks and network software architectures in addition to hardware-based and physical network technologies. The paradigm shift in this field is being driven primarily by software-based network technologies, which have also given rise to numerous new network innovations including grid computing, cloud computing, fog computing, edge computing, software-defined networks and content-centric networks. Significant efforts have been made in cellular network technologies to boost the user experience, and as a result, new cellular network technologies including LTE, VoLTE and 5G have also been developed. Efforts continue to be made by researchers in these networking fields due to the demand for and importance of these technologies in present and future situations. Many of these efforts are still in progress, and there are still possibilities that need to be investigated. As a result, it is important to stay up to date on network technology developments and look into further research difficulties that need to be resolved for the benefit of users. This book will present the most recent and leading research in the field of network technologies in order to achieve solutions for various problems that exist in this domain.

Intelligent Computing Kohei Arai, 2023-08-19 This book is a collection of extremely well-articulated, insightful and unique state-of-the-art papers presented at the Computing Conference which took place in London on June 22-23, 2023. A total of 539 papers were received, out of which 193 were selected for presenting after double-blind peer review. The book covers a wide range of scientific topics including IoT, Artificial Intelligence, Computing, Data Science, Networking, Data security and Privacy, etc. The conference was successful in reaping the advantages of both online and offline modes. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

Cryptology and Network Security Jing Deng, Vladimir Kolesnikov, Alexander A. Schwarzmann, 2023-10-30 This book constitutes the refereed proceedings of the 22nd International Conference on Cryptology and Network Security (CANS 2023) which was held in October-November 2023 in

Augusta GA USA The 25 papers presented were thoroughly revised and selected from the 54 submissions They are organized in the following topical sections Schemes I Basic Primitives Security MPC with Cards Blockchain MPC and Secret Sharing Schemes II *Proceedings of the 2022 International Petroleum and Petrochemical Technology Conference* Jia'en Lin,2023-05-10 This book is a compilation of selected papers from the 6th International Petroleum and Petrochemical Technology Conference IPPTC 2022 The work focuses on petroleum petrochemical technologies and practical challenges in the field It creates a platform to bridge the knowledge gap between China and the world The conference not only provides a platform to exchanges experience but also promotes the development of scientific research in petroleum petrochemical technologies The book will benefit a broad readership including industry experts researchers educators senior engineers and managers

Smart Trends in Information Technology and Computer Communications Aynur Unal,Malaya Nayak,Durgesh Kumar Mishra,Dharm Singh,Amit Joshi,2016-12-24 This book constitutes the refereed proceedings of the First International Conference on Smart Trends in Information Technology and Computer Communications SmartCom 2016 held in Jaipur India in August 2016 The 106 revised papers presented were carefully reviewed and selected from 469 submissions The papers address issues on smart and secure systems technologies for digital world data centric approaches applications for e agriculture and e health products and IT innovations research for knowledge computing

Mobile OS Vulnerabilities Shivi Garg,Niyati Baliyan,2023-08-17 This is book offers in depth analysis of security vulnerabilities in different mobile operating systems It provides methodology and solutions for handling Android malware and vulnerabilities and transfers the latest knowledge in machine learning and deep learning models towards this end Further it presents a comprehensive analysis of software vulnerabilities based on different technical parameters such as causes severity techniques and software systems type Moreover the book also presents the current state of the art in the domain of software threats and vulnerabilities This would help analyze various threats that a system could face and subsequently it could guide the securityengineer to take proactive and cost effective countermeasures Security threats are escalating exponentially thus posing a serious challenge to mobile platforms Android and iOS are prominent due to their enhanced capabilities and popularity among users Therefore it is important to compare these two mobile platforms based on security aspects Android proved to be more vulnerable compared to iOS The malicious apps can cause severe repercussions such as privacy leaks app crashes financial losses caused by malware triggered premium rate SMSs arbitrary code installation etc Hence Android security is a major concern amongst researchers as seen in the last few years This book provides an exhaustive review of all the existing approaches in a structured format The book also focuses on the detection of malicious applications that compromise users security and privacy the detection performance of the different program analysis approach and the influence of different input generators during static and dynamic analysis on detection performance This book presents a novel method using an ensemble classifier scheme for detecting malicious applications which is less susceptible to the

evolution of the Android ecosystem and malware compared to previous methods The book also introduces an ensemble multi class classifier scheme to classify malware into known families Furthermore we propose a novel framework of mapping malware to vulnerabilities exploited using Android malware s behavior reports leveraging pre trained language models and deep learning techniques The mapped vulnerabilities can then be assessed on confidentiality integrity and availability on different Android components and sub systems and different layers
