Re-Composing YouTube Jonas Wolf, 2024-09-03

YouTube features a wide array of multimodal musical figurations, including fan-made music videos, musical aestheticisations of pre-circulating content and musical self-performances

Jonas Wolf explores open-ended forms of musical creative relay on YouTube, delving into formal, imitative, affective and non-institutional aspects of networked media, remix and self-aestheticisation

Beyond creating value for non-musical fields of discourse, this study is directed at filling a gap in a largely ocularcentric domain of study

It provides a concise theory of vernacular composition within our time's total digital archive that accounts for socio-aesthetic phenomena and their relation to systems of knowledge control and discourse

Best Loser Wins Tom Hougaard, 2022-08-16

Best Loser Wins is an intimate insight into one of the most prolific high-stake retail traders in the world

Tom Hougaard is the winner of multiple trading competitions and, on one occasion, traded 25,000 into more than 1 million over the course of a year

While the average retail trader risks 10 per point in the underlying asset, Tom Hougaard frequently risks up to 3,500 per point

This risk exposure requires a mindset that is out of the ordinary

Normal thinking leads to normal results; for exceptional results, traders must think differently

This book will guide and inspire you in ways no other trading book has

It is not about strategies and money management; it is about mind management

Tom Hougaard provides a unique and refreshingly personal account of how an ordinary trader elevated his game to incredible heights by focusing as much on his mental approach as on his technical analysis

Best Loser

Wins explains how you by thinking differently when you are trading can elevate your game from mediocre and sporadic to excellent and consistent No amount of technical analysis will ever do that for you Tom Hougaard says People don't fail because they don't know enough about technical analysis They fail because they don't understand what the markets are doing to their minds Best Loser Wins is an antidote to conventional and flawed thinking in trading and a blueprint for a new belief system for traders who want to elevate their results to levels they never dreamed they could reach **The**

Psychology of Trading Balakrushna Swain, 2025-08-11 The Psychology of Trading is a deeply practical and inspiring exploration into the inner game of trading where most battles are silently fought and won Written by a certified life coach and trading psychology mentor this book bridges the gap between technical skill and emotional intelligence Through relatable insights and grounded strategies it guides readers on a journey of mindset mastery emotional regulation and gradual transformation You'll discover how subconscious beliefs daily habits and emotional patterns silently influence your trades and how to shift them With frameworks drawn from NLP mindfulness and universal principles like the 80/20 rule and 1% growth mindset this book is designed to help you trade smarter and live better Whether you're just beginning or looking to break through a plateau it offers not just tools but a new lens to see the markets and yourself This is not just about becoming a better trader It's about becoming a stronger more centred human being **Teaching Mathematics at a**

Technical College Zachary Youmans, 2022-11-25 Not much has been written about technical colleges especially teaching mathematics at one Much had been written about community college mathematics This book addresses this disparity Mathematics is a beautiful subject worthy to be taught at the technical college level The author sheds light on technical colleges and their importance in the higher education system Technical colleges are more affordable for students and provide many career opportunities These careers are becoming or have become as lucrative as careers requiring a four year degree The interest in technical college education is likely to continue to grow Mathematics like all other classes is a subject that needs time energy and dedication to learn For an instructor it takes many years of hard work and dedication just to be able to teach the subject Students should not be expected to learn the mathematics overnight As instructors we need to be open honest and put forth our very best to our students so that they can see that they are able to succeed in whatever is placed in front of them This book hopes to encourage such an effort A notable percentage of students who are receiving associate degrees will go through at least one of more mathematics courses These students should not be forgotten about their needs are similar to any student who is required to take a mathematics course to earn a degree This book offers insight into teaching mathematics at a technical college It is also a source for students to turn toward when they are feeling dread in taking a mathematics course Mathematics instructors want to help students succeed If they put forth their best effort and ours we can all work as one team to get the student through the course and onto chasing their dreams Though this book focuses on teaching mathematics some chapters expand to focus on teaching in general The overall hope is the reader will be
