Sociology as Method Paul Dowling, 2009-01-01 Dowling is using the term forensics to refer to approaches to research that claim to uncover truths about the world that are somehow independent of the means of their uncovering For some time now such approaches have been widely regarded as naïve but it is not clear that the implications of this recognition have always been adequately or appropriately taken into account In attempting to do just that Dowling presents a mature exposition of his organisational language social activity method SAM in dialogue with a wide range of cultural settings texts and technologies SAM has been developed over a period of some twenty years via the transaction between a fundamental theoretical principle and empirical data This principle asserts that the sociocultural is to be understood in terms of strategic autopoietic action directed at the formation maintenance and destabilising of alliances and oppositions and the alliances and oppositions that are themselves emergent upon such action This anti forensic constructive description understands data texts not as products of generative structures that lie behind them but as instances of the organisational language SAM that will ultimately describe them and that is in a sense in front of them Dowling describes himself as a theory engineer The productivity of this work is in its potential to generate principled and articulated descriptions of empirical settings and texts new ways of looking at them not to direct but to interrogate other practices relating to these settings and texts to ask questions that would otherwise be left unasked The origins of SAM lie in the analysis of mathematics education texts in the late 1980s and early 1990s and one of the chapters in this volume is again concerned with mathematics and science education in the first part of the twenty first century Other settings that come under scrutiny include classrooms film art literature knowledge in various domains the internet and so forth The book also includes fundamental engagement with forensics in particular the work of and work inspired by Basil Bernstein Paul Dowling is Professor of Education at the Institute of Education University of London Before joining the Institute in 1987 he had taught mathematics in secondary schools in and around London His other publications include *The Sociology of Mathematics Education Mathematical Myths Pedagogic Texts* 1998 Falmer Press and *Doing Research Reading Research Re-interrogating education* with Andrew Brown Routledge 1998 and 2009

The Dreamcast Encyclopedia Chris Scullion, 2023-11-30 The newest installment in Chris Scullion's video game encyclopedias *The Dreamcast Encyclopedia* is the fifth book in Scottish

author and games journalist Chris Scullion's critically acclaimed series of video game encyclopedias *The Sega Dreamcast* is fondly remembered by players as a games console that was ahead of its time almost to a fault. Its incredible graphics offered a level of detail that hadn't been seen on home systems to that point and its built-in modem brought online multiplayer to many console players for the first time ever. Ultimately though, the release of the PS2 and later the GameCube and Xbox led to struggling sales and Sega would eventually pull the plug on the Dreamcast just two years into its life, bowing out of the console manufacturing business altogether. On paper, the Dreamcast was a commercial failure, but those who owned one remember it so fondly that for many it remains one of the greatest games consoles of all time with a small but well-formed library of high-quality games. This book contains every one of those games, including not only the entire western library of around 270 titles but also the 340 or so games that were exclusively released in Japan. With over 600 games covered in total screenshots for every title and a light-hearted writing style designed for an entertaining read, *The Dreamcast Encyclopedia* is the definitive guide to one of the most underrated gaming systems of all time. **Virtual Gender** Alison Adam, Eileen

Green, 2005-08-03 As yet there has been relatively little published on women's activities in relation to new digital technologies. *Virtual Gender* brings together theoretical perspectives from feminist theory, the sociology of technology and gender studies with well-designed empirical studies to throw new light on the impact of ICTs on contemporary social life. A line-up of authors from around the world looks at the gender and technology issues related to leisure, pleasure and consumption, identity and self. Their research is set against a backdrop of renewed interest in citizenship and ethics and how these concepts are recreated in an on-line situation, particularly in local settings. With chapters on subjects ranging from gender switching on-line, computer games and cyberstalking to the use of the domestic telephone, this stimulating collection challenges the stereotype of woman as a passive victim of technology. It offers new ways of looking at the many dimensions in which ICTs can be said to be gendered and will be a rich resource for students and teachers in this expanding field of study.
